Barr's Pure Lawn Grass Seeds

Produce Beautiful Smooth Lawns, Tennis and Cricket Grounds, Bowling Greens, etc.

Renovate Lawns in September, after the wear of Summer.

The following Mixtures of Grass Seeds are composed of thoroughly cleaned seeds of highest quality only, and contain neither Clover nor coarse Grasses; they cannot fail to give the greatest satisfaction. The seed is sold by weight, as being the only correct method of estimating the quantity needed for a given space.

Sow 80 lb. per acre, or 1 lb. to every 50 square yards, if the ground is required to be covered quickly, and for renovating bald patches, or where the grass is thin or poor, especially after a summer's hard wear, and under trees, sow 20 to 30 lb. per acre or $\frac{1}{2}$ lb. to every 50 square yards.

Leaflet on the Management of Lawns free on application.

Barr's Dwarf Mixture of Evergreen Grasses for producing an Extra Fine Smooth Lawn, a special mixture of the finest-leaved and dwarfest-growing perennial grasses, which from their fine, close, slow habit of growth and pleasing colour are best suited for forming lawns of the shortest and finest herbage, and thus greatly economising labour in mowing.

Per lb. 2s. 3d.; 20 lb. for 42s.

Barr's "Standard" Evergreen Grasses, for Garden Lawns, Tennis Courts, etc. This mixture is composed principally of the fine-leaved dwarf-growing grasses, all the seeds being highly cleaned and of pure and genuine quality. Per lb. 1s. 10d.; 20 lb. for 34s.

Barr's "Thames Embankment" Evergreen Grasses for Parks, Golf Links, Cricket Grounds, and Bowling Greens, a special mixture which has been found very successful on the Thames Embankment, and in the formation and renovation of many public and private parks and squares around London and throughout the country. Per lb. 1s. 3d.; 20 lb. for 24s.

Barr's Special Mixture of Evergreen Grasses for sowing under Trees, a careful selection of those grasses most suitable for sowing under trees or in shady places. Per lb. 2s. 9d.

Fine-leaved Fescue Grass (*Festuca ovina tenuifolia*), for sowing where little bulbs are to be naturalised, such as Narcissi Cyclamineus, Minimus, etc.; also Scillas, Chionodoxas, Snowdrops, etc. Per lb. 2s. 6d.

Dutch Clover, Finest White. No Clover is included in our mixtures of Grasses, as we consider a lawn should consist of Grass alone. If Clover is desired, however, it may be used at the rate of 3 to 5 lb. per acre; but it is preferable to sow the Clover separately from the Grass Seed. Per lb. 1s. 9d.

Barr's Special Lawn Phytobroma.

The best manure for Grass Lawns, Tennis Courts, Bowling Greens, Golf Links, etc.

Apply Spring and Autumn, using 2 oz. to the square yard at each application.

Barr's Lawn Phytobroma is composed of those ingredients calculated to encourage a vigorous growth of grass only, and in this respect differs from the potash manures, which are apt to stimulate clovers and coarse weeds. We can confidently recommend it for all grass-lands, as, by its use, a thicker growth and a richer colour will be obtained. It is a highly concentrated manure, and is therefore economical in use, a small quantity only being required at each application. *Circular with fuller particulars sent on application.*

Nett Prices—2 lb. tin, 1s.; In bags—7 lb., 2s. 6d.; 14 lb., 4s. 6d.; 28 lb., 7s. 6d.; 56 lb., 12s. 6d.; 1 cwt., 20s.

Prepaid Orders for 28 lb. and upwards sent Carriage Paid to any station in Great Britain or to any port on the Irish Coast.

BARR'S FERTILISED FIBRE, SHELL, AND CHARCOAL MIXTURE.

Ready mixed for use.

A specially prepared Mixture suitable for growing bulbs in vases, bowls, jardinets, etc. A charming effect can be obtained by growing spring-flowering bulbs in fancy vases and bowls, with or without drainage, by the use of our **Fertilised Fibre, Shell, and Charcoal Mixture**; the mixture is light, clean, and nice to handle, and *remains sweet* (an important matter where the vases used have no drainage holes); indeed, it is in every way preferable to soil where bulbs are grown in bowls or vases.

Per Bushel, 3s. 6d.; per Peck, 1s. (*Bags free.*)

SPECIAL FANCY VASES AND BOWLS for growing Spring-flowering Bulbs in.

We have had special vases made for us by Messrs. Doulton for the above-named purpose. The vases are of elegant shape, and without drainage holes, thus saving the use of saucers. They will be found most useful for Daffodils, Hyacinths, Tulips, Crocuses, Early Scillas, Snowdrops, Chionodoxas, Lily of the Valley, etc., either for table decoration or the greenhouse. During Summer they may be used for standing little pot-plants in and other table decoration.

Barr's "Doulton-Ware" Bulb Vases, unglazed, neutral drab shade:—2½ in. diameter, -/9; 4 in. dia., 1/3; 5½ in. dia., 2/-; 7 in. dia. 3/- each.

Ditto, **glazed**, in dark or light green:—2½ in. dia., -/9; 4 in. dia., 1/3; 5½ in. dia., 2/-; 7 in. dia. 3/- each.

Fancy Japanese Bowls:—5 in. diameter, -/10; 6 in. dia., 1/3; 7 in. dia., 1/9; 8½ in. dia., 3/-; 9½ in. dia., 4/-; 10½ in. dia., 6/-; 12 in. dia., 8/6 each.

Illustrated List of Bowls for Bulb Culture, sent on application.

BARR'S Autumn Bulb Catalogue.

1911

We have been awarded at the principal London Flower Shows for our Exhibits
of Spring-flowering Bulbs, etc.,

**FORTY-NINE GOLD MEDALS, A TEN-GUINEA CHALLENGE CUP,
AND
TWENTY-ONE SILVER CUPS,**

Also many **FIRST-CLASS CERTIFICATES** and other high awards.

A few Practical Hints on Bulb Culture.

Culture for Spring-flowering Bulbs out of Doors.

Proper Condition of Soil.—Plant bulbs only when the ground is in a nice friable state, and never when the soil is wet and sticky; in such cases plant later when the soil is in a good friable condition. After digging or trenching, the ground should be allowed to settle at least ten days before planting.

Depth to Plant.—Many amateurs commit the fault of planting bulbs too deeply (crocuses especially), and consequently have failures. A good general rule to follow is to cover the bulb with soil once and a half to twice its own depth, but not more, *measuring the bulb* from base to shoulder. Thus a daffodil bulb measuring two inches from base to shoulder should be covered with three to four inches of soil. Crocuses should be planted still shallower. These remarks do not apply to *Erythroniums*, *Tulips*, and *Snowdrops*, for which special directions are given.

Proper time to Plant and Best Position.—Information on this subject is given at the heading of each family.

Manure for Bulbs.—The ammonia in fresh stable manure is fatal to bulbs and is often the cause of failure in growing Tulips, etc., therefore only well-decayed stable or cow manure, or the material from an exhausted hot-bed, should be used, and then we recommend VAPORITE (*see page 96*) being mixed with it so as to destroy any injurious insect life it may contain. The safest manures for all bulbs growing outdoors is PHYTOBROMA (price 20/- per cwt.; 2/6 per 7 lbs.) or phosphatic basic slag (price 6/6 per cwt.; 1/- per 14 lbs.) for heavy soils, and crushed bones (price 12/6 per cwt., 1/- per 7 lbs.) for light and sandy soils. The PHYTOBROMA should be applied at the rate of 8 cwt. per acre, or 3 oz. per square yard, early in spring, when top growth is showing; PHOSPHATIC BASIC SLAG OR CRUSHED BONES should be put in the ground with the bulbs at the time of planting, the former at the rate of 1 ton per acre, or 7½ oz. per square yard, and the latter at the rate of 4 cwt. to the acre, or 1½ oz. to the square yard, and after planting, sprinkle on the surface of the ground SULPHATE OF POTASH at the rate of 2 cwt. per acre or ¾ oz. per square yard (price 21/- per cwt., 1/9 per 7 lbs.). Where basic slag or crushed bones are used, PHYTOBROMA may also be given at the rate of 1½ oz. to the square yard in spring, when top growth is showing. On hot dry and sandy soils, old stable manure (treated with Vaporite) may with advantage be used, to act as a sponge to hold moisture in the soil; it should be dug in 15 to 18 inches deep, so as not to come in contact with the bulbs.

Top Dressing.—Where possible, we advise a top dressing to all bulbs through the winter months with some light material such as long straw litter, cut heather, cut furze branches, or cut fern bracken resting on pea sticks (cut fern used by itself lies too wet and is apt to rot the young growths). *The advantage* of this light covering is that it keeps the surface soil sweet by preventing the heavy winter rains from beating down the earth's crust; it also protects any early top growth.

Lifting and Replanting.—When bulbs are lifted they should not, if possible, be replanted on the same ground, but where other bulbs or plants have previously been growing: thus, where Tulips have been growing last season, plant Narcissi this autumn, and so on.

Culture for Spring-flowering Bulbs in Pots or Boxes.

Time of Potting.—From the middle of September to the middle of October is the best month for potting most Spring-flowering bulbs.

The best compost to use is a mixture of two-thirds good fibrous loam (which should be pulled to pieces by the hand, *and not passed through a sieve*, so as to retain in the soil as much old root fibre as possible), and one-third old decayed leaf soil, with a sprinkling of sharp silver sand, adding 1½ lbs. of bone meal or 1 lb. of Phytobroma (*see page 96*) to every bushel of soil, which mix well together before using. In all cases the soil used should be fresh and sweet; *never pot in soil that is wet or sticky*. Barr's Fertilised Fibre, Shell and Charcoal Mixture (*see page 2 of Cover*) may also be used; it is light and cleanly to handle, and is a suitable medium for growing all kinds of spring-flowering bulbs in pots or vases, either for indoor decoration or for cutting.

Sterilising Soil.—In order to destroy all injurious insect life it is a good plan to sterilise potting soil before adding the Phytobroma or bonemeal. This can be easily done by placing a bushel of soil in a sack, pouring over it a large kettle of boiling water and then spreading out the soil to dry. This will prevent a great deal of after trouble from worms or insects attacking the bulb roots. Another method of freeing soil of insect life is to use Vaporite (*see page 96*).

The pots should be carefully washed out with boiling water and wiped dry before using. *Never use dirty or wet pots.*

Good drainage should be secured by placing three or more pieces of charcoal (in preference to broken crocks) over the drainage hole, covering the charcoal or crocks with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with pieces of charcoal, and a good layer of rough fibrous loam or leaf soil placed at bottom of box to ensure perfect drainage.

Covering the Bulbs.—The larger bulbs need not be quite covered with soil, the level of which should be half an inch below the rim of the pot, to allow of watering when the bulbs are in growth.

After potting, stand the pots or boxes outside in the open, on a firm bottom such as a bed of ashes or a gravel path to prevent the entrance of worms. They should then be surrounded and completely covered with Cocoa Fibre, old decayed leaf soil or very old ashes (free from sulphur), the tops being 2 inches below the surface of the covering material. This will secure a natural and moist condition to the bulbs and encourage root action. So long as the pots or boxes remain buried in this way they will require no watering.

CULTURE OF BULBS IN POTS OR BOXES—continued.

The pots or boxes should remain plunged for about twelve weeks (Roman Hyacinths rather less), in order that the bulbs may get well rooted, after which portions may be removed indoors in succession, selecting first those which bloom naturally early. Place first in a cold frame, cool greenhouse, or cold sitting-room free from draughts, and keep partially shaded for a few days, giving water gradually. Very weak liquid manure-water may then be given once a week until they come into flower. Those that are wanted in bloom early may, after the flower buds are advanced, be placed in a warmer temperature, such as a slow forcing-house, but this should never exceed 65° if fine blooms are desired. The plants should always be kept as near to the glass as possible and not allowed to get drawn, from an insufficient supply of light or air. *On no account should bottom heat be given.* A frequent mistake made in forcing bulbs is that they are removed from the plunging-bed too early, before they have made a sufficient quantity of fibrous roots; they are then at once subjected to heat, and failure is the result. It is a good plan, when bulbs are removed from the plunging-bed, to place an inverted flower-pot over them for a day or two to prevent any check from draughts to the young top growths.

Pot-Culture of Early Gladioli, Ixias, Sparaxis, Tritonias, Babianas, Calochorti, etc.

These bulbs start early into growth and therefore should not be potted up before the end of October to November. The pots should be plunged up to the rim only (not covered) in a cold frame, and protected with mats during severe frosty weather. There they should remain for about three months, after which the treatment is similar to that for Spring-flowering bulbs.

Culture of Spring-Flowering Bulbs in Vases and Bowls.

Such as Hyacinths, Tulips, Daffodils, Crocuses, Sellias, Chionodoxas, Snowdrops, etc., in Barr's Special Fibre Mixture.

A charming effect can be obtained by growing spring-flowering bulbs in fancy vases and bowls, with or without drainage, by simply using our specially prepared **Fertilised Fibre, Shell and Charcoal Mixture** (3s. 6d. per bushel, 1s. per peck); the mixture is light, clean, and nice to handle, and *remains sweet* (an important matter where the vases used have no drainage holes); indeed, it is in every way preferable to soil for growing bulbs in fancy bowls and vases.

NARCISSUS GOLDEN SPUR
growing in Barr's Fertilised Fibre Mixture.

Culture.—Fill the vase or bowl with the **Fibre, Shell and Charcoal Mixture** up to within a little below the rim, and plant the bulbs in the same manner as with ordinary potting soil, just covering them; the mixture may be shaken down into place after planting and lightly watered, but should not be pressed down tightly, or the bulbs will be forced upwards when root growth commences.

After planting, either of the following plans may be adopted:—

(a) The bowls or vases may be plunged outdoors on a bed of cocoa fibre or ashes, and covered entirely with cocoa fibre, leaving them thus for 8 to 12 weeks, when the bulbs will have made good fibrous roots.

(b) Or the bowls may be plunged in a cold frame, airy cellar, or out-house instead of outdoors; with this treatment, however, it will be necessary to occasionally give water.

(c) A third plan is to place the bowls after potting in a dark or moderately dark *airy* place, cool but not too cold; they must not be placed in a close cupboard or the bulbs will certainly suffer; treated thus they will also require a little water occasionally.

In the case of bulbs plunged outdoors there will be no need to give any attention in the way of watering, as they will, of course, have abundance of moisture from the autumn rains. Where, however, the bulbs are not exposed to the rain, the bowls should be examined once or twice a week, care being taken that the fibre mixture is kept uniformly damp; but for the first week or two after planting water should be given very sparingly, sufficient only to keep the fibre damp enough to encourage root action. As soon as the bulbs are well rooted, water may be given more freely, the fibre mixture being then kept quite moist; *if the mixture is allowed at any time to become dry, even for a day, the flower buds will go blind*; should by any chance too much water have been given the bowls may be drained by carefully tipping them on their side. If obtainable, rain water is the best to use.

When the bulbs have made some top growth the bowls should be removed to the sunny window of a sitting room, where they will get the morning sun, or be kept in a cool greenhouse close to the glass, it being necessary that they should be given sufficient light and air to prevent the foliage from becoming drawn. Draughts and gas heat must be carefully avoided.

No bottom heat should be given, and a temperature of 55° to 60° by day and 50° to 55° by night is sufficient to obtain good blooms; the bulbs resent too warm a temperature.

 For Bowls and Fertilised Fibre Mixture, see page 2 of Cover.

Bulbs and Plants for Early Forcing To Bloom during Winter and Very Early Spring.

Full descriptions will be found in the body of Catalogue, which is arranged alphabetically.

ALLIUM neapolitanum, beautiful pure white flowers, per 100, 2/6; per doz. 5d.

CHOISYA ternata (Mexican Orange Flower), each 1/6 and 2/6

CHRISTMAS ROSE (Helleborus). See page 89.

CYCLAMEN persicum, plants well set with bud, per doz. 15/-, 21/- & 25/-; each 1/6, 2/- & 2/6

DAFFODILS, which may be potted early and put into gentle heat end of January (not before):—

Golden Spur, Henry Irving, Obvallaris, Empress, Victoria, Telamonius plenus, Artemis, Blackwell, Sir Watkin, Stella superba, Ariadne, Bridesmaid, Fairy Queen, Odorus Campanella, Firebrand, Cassandra, Ornatius, Elvira. For descriptions and prices see Daffodil Catalogue.

DEUTZIA gracilis (Japanese Snow Flower), each 1/6 & 2/6

„ „ **carminea**, each 1/6

„ **Lemoinei**, each 1/6

DICENTRA spectabilis, *extra strong clumps*, per doz. 6/6; each 7d.

FREESIA refracta, white with yellow blotch per 100, 6/6; per doz. 1/-

„ „ *extra large bulbs* „ 8/6; „ 1/3

„ „ **alba** (the true pure white variety) „ 6/6; „ 1/-

„ **Leichtlini major**, primrose with orange blotch „ 6/6; „ 1/-

„ „ „ *extra large bulbs* „ 8/6; „ 1/3

GALANTHUS Elwesii, Extra Early Strain, a beautiful Giant Snowdrop for forcing. *Extra strong bulbs*, per 100, 6/6; *monster bulbs*, per 100, 7/6.

HYACINTHS—

Early White Roman Extra Selected French-grown Bulbs—

Extra Large Selected Bulbs, per 100, 21/-; per doz. 3/- *First-size Selected Bulbs*, per 100, 16/6; per doz. 2/4. *A few Monster Bulbs, scarce*, per 100, 27/6; per doz. 3/9

Barr's "Extra Early" Blush Italian, per 100, 30/-; per doz. 4/3

„ **Blue Italian**, per 100, 14/6; per doz. 2/-

„ **Ivory White Italian**, per 100, 14/6; per doz. 2/-

„ **Parisian Double Blue**, per 100, 21/-; per doz. 3/-

„ **Primrose Italian**, per 100, 35/-; per doz. 5/-

„ **Shell-Pink Italian**, per 100, 21/-; per doz. 3/-

HYDRANGEA paniculata grandiflora, each 1/6

„ **hortensis**, each 1/6

LILY OF THE VALLEY—Retarded Crowns. For culture, see page 60.

Finest Berlin Retarded Crowns, supplied as required all the year round, per 100, 9/6

Fortin's Grand Giant Strain, supplied as required from September to December and from March to June, per 100, 21/-

PHILADELPHUS (The Mock Orange or Syringa of Gardens).

„ **grandiflorus**, each 1/6

„ **Boule d'Argent**, each 1/6

„ **Lemoinei erectus**, each 1/-

„ **microphyllus**, each 1/-

POLYANTHUS NARCISSUS—

Paper White "Snowflake," Improved.

Extra Strong Selected Bulbs, per 100, 8/6; per doz. 1/3

Double Roman. *Extra Strong Selected Bulbs*, per 100, 8/6; per doz. 1/3

Gloriosus. *Extra Strong Selected Bulbs*, per 100, 10/6; per doz. 1/6

Grand Soleil d'Or. *Extra Strong Selected Bulbs*, per 100, 9/6; per doz. 1/4

POLYGONATUM multiflorum (Tall Solomon's Seal), per 100, 8/6; per doz. 1/3

„ **officinale** (Dwarf Solomon's Seal) „ 9/6; „ 1/4

SPIRÆA japonica retarded clumps, per doz. 8/-

„ **compacta multiflora**..... „ „ 8/-

„ **astilboides floribunda** ... „ „ 10/6

„ **palmata**, rose-crimson..... „ „ 10/6

„ **Peach Blossom and Queen Alexandra.** These pink varieties should only be used for later forcing (see page 93). If forced too early they lose their pretty colour.

Spireas for later forcing, see page 93.

TULIPS for Early Forcing. See Special List, page 71.

Barr's Famous "Covent Garden"

Collections of Bulbs.

These Collections are not subject to Cash Discount, the prices being strictly nett.
In the case of Prepaid Orders, however, all Collections are delivered Carriage Paid.

(After November 1 we may find it necessary to make slight changes in the Collections.)

A.—Barr's 21/- Collection of Bulbs for Forcing.

Containing over 300 Bulbs of fine quality, as follows :

12 Choice Named Hyacinths	24 Sweet-scented Single Jonquils	6 Single Tulip, Cottage Maid
12 Early White Roman Hyacinths	3 Daffodil Golden Spur	6 " " Keizerskroon
3 " Blush Italian "	3 " Henry Irving	6 Double Tulip Tournesol
3 " Primrose Italian Hyacinths	3 " bicolor Horsfieldii	50 Splendid (Named) Crocuses
6 Double Roman Narcissi	3 " Queen of Spain	24 Scilla sibirica
6 Paper White "Early Snowflake" Narcissi (Soleil d'Or"	3 " Telamoniun plenus	50 Elwes' Giant Snowdrop
3 Polyanthue Narcissus "Grand	12 " poeticus ornatus	12 Chionodoxa Lucillæ
3 " " Grand Monarque	12 Single Tulip, Early Scarlet, "Duc Van Thol"	12 " sardensis
	6 " " Chrysolora	12 Allium neapolitanum
		12 Freesia mixed hybrids

A. Barr's Collections of Bulbs for Forcing, 42/-, 63/-, 84/-, and 105/-,

Containing equally liberal assortments of suitable Bulbs of fine quality, as in the 21/- Collection.

B.—Barr's 21/- Collection of Bulbs for the Greenhouse, Sitting-Room, etc.

Containing 300 Bulbs of fine quality.

Arranged for those who prefer a few sorts only of easily cultivated Winter- and Spring-flowering Bulbs.

18 Choice Named Hyacinths	3 Daffodil Emperor	6 Single Tulip Van Vondel
12 Early White Roman Hyacinths	3 " bicolor Empress	6 Double Tulip Tournesol
6 Paper White "Early Snowflake" Narcissi	3 " Queen of Spain	100 Splendid Crocuses (Named)
3 Polyanthue Narcissus Grand Monarque	3 " Telamoniun plenus	24 Scilla sibirica
3 " " Grand Soleil d'Or	6 " poeticus ornatus	12 Chionodoxa Lucillæ
24 Sweet-scented Single Jonquils	6 Single Tulip Chrysolora	12 " sardensis
3 Daffodil Golden Spur	6 " " Dusart	24 Elwes' Giant Snowdrop
	6 " " Princess Marianne	12 Milla uniflora

B.—Barr's 12/6 Collection of Bulbs for Greenhouse, etc.

Containing rather more than half the quantity of Bulbs as in the 21/- Collection.

B.—Barr's Collections of Bulbs for Greenhouses, etc., 42/-, 63/-, 84/-, and 105/-,

Containing equally liberal assortments of suitable Bulbs of fine quality, as in the 21/- Collection.

For directions as to potting and treatment of bulbs before they are brought into the greenhouse, or forcing-house, see page 2.

C.—Barr's 21/- Collection of Bulbs for the Flower Garden.

Containing 600 Bulbs of fine quality, most suitable for outdoor decoration.

25 Hyacinthe, Barr's Rainbow Mixture	25 Single Tulips, Barr's Rainbow Mixture . [Mixture	12 Blue Grape Hyacinth
6 Polyanthue Narcissi, mixed	25 Double Tulips, Barr's Rainbow	10 Allium Moly, yellow
5 Daffodil Queen of Spain	50 Crocus, large yellow	25 Star of Bethlehem
5 " princeps	50 " " purple	25 Wood Hyacinths, mixed
5 " Incomparabilis Beauty	50 " " white	18 Milla uniflora
5 " " Stella	50 Snowdrops	25 Summer Snowflakes

5 " Leedsi Minnie Hume	12 Chionodoxa Lucillæ	25 Spanish Irises, mixed
5 " poeticus ornatus	12 " sardensis	12 English Irises, mixed
12 Jonquill Daffodil "Ruguloene"	24 Winter Aconites	50 Anemone, Large-flowered, Single, mixed

C.—Barr's 12/6 Collection of Bulbs for Flower Garden,

Containing rather more than half the quantity of the Bulbs enumerated in the above 21/- Collection.

C.—Barr's Collections of Bulbs for Flower Garden, 42/-, 63/-, 84/-, and 105/-,

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

D.—Barr's "Woodland" 21/- Collection of Bulbs

For Naturalising in Woodlands, Orchards, Wild Gardens, &c.

Containing 800 suitable Bulbs of fine quality.

200 Daffodils, in 10 named varieties	50 Wood Hyacinths, mixed	12 Snakeshead Fritillaris
25 Cottage Tulips, mixed	75 Elwss' Giant Snowdrops	12 Camassia esculenta
50 Winter Aconites	25 Summer Snowflakes	3 Crown Imperials, mixed
50 Star of Bethlehem, white	25 Dog's-Tooth Violets, mixed	3 Lillium candidum (<i>Madonna Lily</i>)
50 Blue Graps Hyacinths	15 Blue Apennine Anemones	3 " umbellatum, mixed
125 Crocuses, mixed	50 Milla uniflora (Tritsietla)	3 " pyrenaleum, yellow
	25 Allium Moly, yellow	

D.—Barr's 12/6 "Woodland" Collection of Bulbs,

Containing rather more than half the quantity of Bulbs in the above 21/- Collection.

D.—Barr's "Woodland" Collections of Bulbs, 42/-, 63/-, 84/-, and 105/-,

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

For hints on naturalising Bulbs and how to plant in grass without spoiling the turf, see pages 11 and 12.

E.—Barr's "Rock Garden" 21/- Collection of Bulbs

Consisting of charming little

Subjects for Naturalising on Rockwork, Banks, etc.,

where they will soon establish themselves and form a delightful picture.

For full descriptions, see body of Catalogue.

12 Allium Moly	6 Crocus biflorus	6 Daffodil minimus
6 " acuminatum Murray-anum	12 " Susianus	12 Ornithogalum montanum
6 " triquetrum	3 Corydalis bulbosa	6 Puschkinia scilicoides compacta
12 Anemone fulgens	12 Erythronium American large-flowered, mixed	6 Romulea bulbocodium var. nivalis
12 " apennina	6 Fritillaria aurea	12 Scilla sibirica
6 Bloomsia aurea	25 Galanthus Elwesii	12 " bifolia
12 Brodiaea grandiflora	6 Hyacinthus amethystinus	6 " hispanica aperta
12 Chionodoxa Lucellæ	3 Iris Danfordiæ	6 " " alba
12 " sardensis	6 " reticulata	6 Sternbergia lutea major
6 Crocus asturicus	12 Leucojum vernum carpathicum	2 Tropæolum polyphyllum

F. Barr's Choice "Alpine Garden" 12/6 Collection of Bulbs,

Containing rather more than half the quantity of Bulbs supplied in the above 21/- collection.

A Few Fine Novelties and Specialities

In Bulbs and Tubers for 1911.

Those bulbs and tubers marked thus × ripen late and are sent out variously from the middle of October to March. All other bulbs, etc., are ready for despatch in September. Orders which embrace earlier and later ripening bulbs, etc., will be executed therefore in two parts.

ANEMONE

each—s. d

"St. Brigid," an extra fine strain of these lovely Poppy Anemones, flowers very large, mostly semi-double, with finely divided petals, and of the most brilliant and varied shades of colour, all having a handsome blue-black central boss; very graceful in habit, ht. 1 ft. (*We send out healthy young flowering roots, which give a much better result than older and larger ones*) per 100, 10/6; per doz. 1/6 —

St. Brigid "Lord Roberts," large semi-double flowers, brilliant scarlet with white centre and a handsome central black boss, robust and free, ht. 1 ft., per 100, 17/6; per doz. 2/6 0 3

St. Brigid, Crimson, Vermilion, Roses, and Pinks, mixed, a very beautiful strain, producing a most brilliant effect in the garden ...per 100, 15/-; per doz. 2/3 —

Perle Angevine, a very beautiful new Chrysanthemum-flowered Anemone with large pure white double and semi-double flowers, ht. 1 ft. per 100, 18/6; per doz. 2/8 0 3

× **CRINUM acaule,** a rare and distinct species producing singly on a stem handsome flowers with white petals 4 inches long and coloured rose at the back 10 6

CROCUS, Rare and Beautiful Species, autumn, winter, and spring-flowering, gems for the rock garden and pots. *Special descriptive list on application.*

CROCUS.—A few Beautiful little Rare Species.

Aerius major, producing in early spring deep sky-blue flowers with scarlet stigmata 2 6

Chrysanthus cœrulescens, flowers white shaded blue with yellow base, winter-flowering 2 6

„ **E. A. Bowles,** a beautiful new seedling, bearing in winter flowers of perfect form, soft canary-yellow shaded bronze at base, stigmata scarlet 3 6

„ **Siskin,** a new seedling, flowers sulphur-yellow shaded purple towards tip, and with scarlet stigmata 3 6

„ **Warley var.,** a dainty species, outside heavily feathered bronzy blue, inside yellow 1 0

Marathonisius, producing in November beautiful snowy white flowers 1 3

Pulchellus albus, flowers a beautiful pure white with yellow throat 2 6

CROCUS Bleu Celeste and Margot, two lovely pale blue bedding varieties, *see page 25.*

EREMURUS Elwesianus albus, a magnificent variety, producing stately spikes 9 to 10 ft. high, furnished well down the stem with large beautiful white flowers; a grand border and exhibition plant 12 6

ERYTHRONIUM.—Two Beautiful Giant American Varieties.

White Beauty, a very beautiful variety of *E. californicum*, bearing freely large creamy white flowers of good substance with yellow-zoned centre; foliage the most richly mottled of all the Giant Dog's-Tooth Violets. *Strongly recommended* per 100, 30/-; per doz. 4/- —

Pink Beauty, a lovely variety of *E. revolutum*, having large flowers with gracefully reflexing petals, delicate pale pink with central zone of gold *Crop failed* —

FREESIA

Abundance, a lovely new variety, producing freely light rose-coloured flowers tinged mauve and developing to a deep carmine-rose per doz. 25/- 2 3

Amethyst, flowers a charming soft shade of lavender or mauve, very beautiful. AWARD OF MERIT R.H.S., 1907 per doz. 25/- 2 3

Dainty Maid, a remarkably pretty new hybrid with habit of *F. refracta alba*, bearing 9 to 12 well-formed flowers on a raceme, silvery lavender slightly tinged rose with a deep golden centre, sweetly scented per doz. 18/- 1 9

Fairy Queen, a lovely new variety raised by Mr. Herbert Chapman, flowers white with a very handsome blotch of reddish orange on lower petals, a remarkably striking flower, sweetly scented 10 6

Le Phare, a very effective new variety, bright carmine-rose deepening in colour with age per doz. 36/- 3 6

New Seedlings, The Herbert Chapman Strain, varying in shade from rich and soft yellows to primrose, apricot, and pure white, some with a deep orange blotch, delicately fragrant; may be gently forced for early blooming per 100, 21/-; per doz. 3/- —

B*

FREESIA—continued.

each—s d

Rosa Bonheur, flowers bright rose developing to earmine-rose with rich yellow blotch on lower petals, beautiful per doz. 25/- 2 3

Rose Queen, a very beautiful variety, flowers brilliant earmine-rose deepening in colour with age; they are fragrant, freely produced and last a very long time in condition. AWARD OF MERIT R.H.S., February 23rd, 1909. (See "The Garden," March 6, 1909)...per doz. 84/- 7 6

Salmonetta, bearing on long stems soft salmon-red flowers tinged apricot, a charming colour per doz. 18/6 1 9

Tubergeni (*F. refracta alba* × *F. Armstrongi*), a pretty hybrid with flowers of a delicate rose-lilac shade with white throat and base of tube bronzy gold, deliciously scented per doz. 21/- 2 0

FRITILLARIA chitralensis, a beautiful new **Crown Imperial** from Chitral, bearing from February to March heads of drooping bell-shaped rich soft yellow flowers. It is very distinct from all other Crown Imperials in foliage and habit, and the flowers have not a disagreeable scent, ht. 1½ to 2 ft.....per doz. 18/- 1 9

GALANTHUS Elwesii, **Extra Early Strain for Forcing**, a remarkably early strain of Elwes' Giant Snowdrop; can easily be brought into bloom in pots or vases for Christmas decoration..... *Extra strong bulbs*, per 1,000, 60/-; per 100, 6/6; per doz. 1/- —
" " " *Monster bulbs* " 7/6; " 1/3 —

GLADIOLUS

× **King Edward VII.**, a beautiful new hybrid of the Early Gladioli *Crimson Queen* × *Ardens*, having in July very large spreading flowers of a brilliant red shaded orange, the three lower petals being marked purple and silver, ht. 18 in. AWARD OF MERIT R.H.S..... 3 6

× **primulinus** (*Maid of the Mist*), a rare and lovely species found growing in the neighbourhood of the Victoria Falls on the Zambesi River, where the spray at times completely covers it. The flowers, which are of a beautiful soft primrose-yellow, are of quaint hooded form and borne on spikes 2 to 3 ft. high, from July to August. Easily grown in pots in a cold greenhouse or out of doors in warm localities; while in full growth the plants should be given a liberal supply of water per doz. 15/- 1 6

× **primulinus hybrids**, containing some beautiful shades of soft primrose, pale buff-yellow, apricot, pale copper and other delicate art shades, ht. 2½ ft. per doz. 15/- 1 6

× **princeps**, a grand showy Gladiolus bearing flowers of great size, very open, and beautifully formed, brilliant deep scarlet with white stripe down centre of petal; remarkably effective in the flower border per doz. 8/6 0 9

× **GLORIOSA Leopoldi**, a fine new **Glory Lily** from the Congo, producing an abundance of beautiful self-golden-yellow flowers; a grand warm greenhouse climber 2 6

× **HYMENOCALLIS Amancæ**, the **Golden-Yellow Peruvian Daffodil**, a rare and handsome greenhouse bulbous plant, ht. 1½ to 2 ft. per doz. 48/- 4 6

IRIS, **New Regelio-Cyclus Varieties**, a lovely new race of Irises, see page 49.

IRIS, **English and Spanish—Beautiful New Varieties**, with large handsome flowers of brilliant varied colours, included in our general list on pages 43 to 46.

IRIS, **New Giant Early Xiphium Irises**, early-flowering hybrids of *I. Xiphium*, etc. See page 46.

LACHENALIAS.—Beautiful New Varieties.

Brightness, bells golden-yellow with crimson tip and claret markings at mouth per doz. 7/6 0 8

Cowslip, bearing on bold spikes large golden bells with expanded mouth deeply margined maroon per doz. 25/- 2 3

Ruby, bells scarlet-yellow and green, very showy " 4/6 0 5

LILIUM

candidum (*The Madonna Lily*) a few monster bulbs, per 100, 55/-; per doz. 7/6 0 8
" " " " " very large bulbs " 35/-; " 5/- 0 6

× **myriophyllum** (*new*), a rare and beautiful refined form of *Lilium Brownii*, bearing in July flowers of great substance, with three very broad petals and three narrower segments recurved at tip and elegantly waved at margin, colour waxy white, anthers golden, back of petals broadly banded ruby-red, sweet-scented, foliage narrow and elegantly curled, ht. 3 ft. 15 0

× **sulphureum** (*syn. Wallichianum superbum* and *ochroleucum*), a very beautiful Trumpet Lily from Upper Burma, producing in September handsome flowers 9 inches long, of great substance, and deliciously fragrant; on first opening they are of a soft sulphur colour, but change ultimately to white tinged rose, ht. 4 to 6 ft. In the South of England and mild localities this charming Lily may be grown out of doors, but otherwise we recommend pot-culture in a cool airy greenhouse, plunging the pots out of doors in summer and bringing them indoors for blooming in autumn. A peaty soil suits it best: strong bulbs 2 6
" " " " " extra strong bulbs 3 6

MONTBRETIAS—Beautiful New Hybrids, see page 62.**MUSCARI**

each—s. d

"Heavenly Blue," the most beautiful of all Starch and Grape Hyacinths, and one of the loveliest blue flowers of spring...*Extra large bulbs*, per 1000, 60/-; per 100, 6/6; per doz. 1/-

Masseyanum, a very distinct new **Tassel-Hyacinth** with bright rosy coloured flowers per doz. 15/- 1 6

NERINE

flexuosa alba, a rare and beautiful bulbous plant, bearing an umbel of about twelve snowy white flowers, with elegantly undulated and recurving petals, ht. 2 ft.; a fine subject for pot-culture in cool greenhouse, or to plant out of doors under a south wall. AWARD OF MERIT R.H.S. and R.B.S., 1906*Strong flowering plants in pots*, per doz. 36/- 3 6

Beautiful New Hybrids from an amateur's collection, varying in colour from pink to dark crimson, ht. 18 in. per doz. 30/- 2 9

TIGRIDIA (Mexican Tiger Flower)—Two New Varieties.

× **"Rose Giant,"** (new), very large and beautiful rose-coloured flowers with spotted centre, a vigorous grower.....per doz. 15/- 1 6

× **"The Giant,"** (new), flowers large, orange-red with rose and yellow, very vigorous per doz. 15/- 1 6

TRITONIA Prince of Orange, a very beautiful variety of *T. crocata*, bearing very freely elegant branching racemes of very large glowing orange-scarlet coloured flowers; a fine bulbous plant for south borders, terrace vases, or for pot culture in cool greenhouse per doz. 17/6 1 6

TULIPS—New varieties and species. Mostly May-flowering.

"De Wet," a beautiful new variety of **Early Single Tulip**, with large bold sweet-scented flowers, colour fiery orange shaded and stippled bright scarlet, centre yellow, very showy, ht. 20 in. per doz. 30/- 2 9

Golden Bronze (4), a remarkably handsome and beautiful **Cottage Tulip**, flower large of beautiful saucer form, colour glossy golden-bronze shaded mahogany towards centre, ht. 26 in.; quite an artist's flower per 100, 40/-; per doz. 5/6 0 6

Inglescombe Yellow (4), may be called a **Yellow Darwin Tulip**, large globular flowers of perfect form of a glossy canary-yellow, a remarkably beautiful flower, ht. 18 in. AWARD OF MERIT R.H.S., May 15th, 1906.....per 100, 25/-; per doz. 3/6 0 4

Kaufmanniana, **Extra selected varieties**, fine selected forms of this beautiful species, flowers large, white, variously marked with shades of red per doz. 12/6 1 3

Lady of the Lake (2), a lovely **Cottage Tulip**, flower a delicate pale lemon shaded primrose, very chaste, ht. 21 in. per 100, 75/-; per doz. 10/6 1 0

Louis XIV. (4), a stately **Cottage Tulip**, bearing globular flowers of immense size, with broad petals rich purple heavily flushed golden-bronze at margin, inside golden-bronze shading to bronzy purple, very tall and stately; remarkably handsome, ht. 26 in. CERTIFICATE OF MERIT R.B.S., May 22nd, 1907.....per doz. 10/6 1 0

Moonlight (1), a very beautiful **Cottage Tulip** with long elegant flowers of a delicate pale primrose; a most valuable Tulip for flower borders or cutting, ht. 20 in. per doz. 7/6 0 8

Mrs. Kerrell, a most lovely **Cottage Tulip** of elegant form with pointed petals, the three outer ones slightly reflexing, colour a beautiful light rose with delicate amber tinge, centre white bordered electric-blue, *very scarce* per doz. 21/- 2 0

Quaintness (4), a very distinct **Cottage Tulip**, large handsome long flowers, inside shaded mahogany on a dark golden ground, outside flushed deep rose. AWARD OF MERIT R.H.S., 1905 2 6

Queen Mary (4), a beautiful new **Cottage Tulip**, with large handsome canary-yellow flowers, having the outer petals slightly recurved, fine erect grower, foliage bluish, ht. 24 in. per doz. 10/6 1 0

retroflexa superba, a handsome new Tulip from the East which might be described as a greatly improved **Retroflexa**, having large soft yellow flowers with broad recurved petals, ht. 18 in. per 100, 45/-; per doz. 6/- 0 7

Sensation, a remarkably handsome new **Parrot Tulip** and a great novelty, flowers very large, with deeply cut and curling petals, heavily blotched and striped blackish purple on a white ground, quite a new colour in **Parrot Tulips** (*only a few bulbs for sale*) 10 6

Sunlight (4), a grand new **Cottage Tulip**, and one of the most brilliantly coloured varieties one could have for garden decoration or cutting; the flowers are of elegant form, intense glowing vermilion with glossy texture and well-defined black centre tipped yellow per 100, 50/-; per doz. 7/6 0 8

Walter T. Ware, a grand **Cottage Tulip**, and the richest deep golden of all, flowers globular, with broad petals, the three outer ones reflexing at the top, very beautiful. A wonderful lasting Tulip, ht. 18 in. AWARD OF MERIT R.H.S., May 15, 1906 7 6

Hardy Spring-Flowering Bedding Plants

For Autumn Planting.

To associate with Spring-Flowering Bulbs in beds and borders or the wild garden.

For Spring decoration in association with bulbs the following plants will be found most useful. By their use as a groundwork or edging the most beautiful harmonies of colour may be obtained. Few sights in Spring are more beautiful than masses of the gold, white, and blue of the *Alyssum*, *Arabis*, and *Aubrietia* associated with breadths of Daffodils, Scillas, Muscaris, etc., or *Forget-me-Nots* (*Myosotis*) and *Golden Polyanthus* mingling with Daffodils or with gorgeous and stately Darwin Tulips, etc. The *Aconas*, *Arenaria balearica*, and Mossy *Saxifragas* make beautiful carpets of foliage for the smaller and daintier spring bulbous flowers, like *Narcissi*, *Cyclamineus*, *Minimus* and *Triandrus*, also *Chionodoxas*, *Small Crocus Speciee*, etc.

ACÆNA (New Zealand Burr), producing dense close carpets of evergreen foliage, rapid growers.	each—s.	d
Buchananii , foliage beautiful soft pea-green, ht. $\frac{1}{2}$ ft.	per doz.	5/6 0 6
pulchella , foliage bronzy grey, ht. $\frac{1}{2}$ ft.	"	5/6 0 6
sarmentosa , foliage a pretty fresh green, ht. $\frac{1}{2}$ ft.	"	5/6 0 6
AJUGA reptans atro-purpurea , foliage rich purple-bronze of dwarf spreading habit, ht. 6 in.	per doz.	5/- 0 6
ALYSSUM saxatile compactum (Gold Duet), covered during May with sheets of golden-yellow flowers, ht. $\frac{1}{2}$ ft.	per doz.	3/6 0 4
" citrinum , covered during May with charming soft lemon-coloured flowers, ht. $\frac{1}{2}$ ft.	"	5/6 0 6
ANTENNARIA tomentosa (Snow In Summer), having a persistent close grey foliage, valuable bedder, ht. 1 in.	per doz.	3/6 0 4
ARABIS albidia compacta (White Rock Cress), covered during April and May with sheets of white flowers, ht. $\frac{1}{2}$ ft.	per doz.	3/6 0 4
" fl. pl. , covered with sprays of double pure white sweet-scented flowers, ht. $\frac{1}{2}$ ft.; a lovely subject for associating with Tulips	per doz.	3/6 0 4
ARENARIA balearica (Creeping Sand Wort), producing a perfectly close green carpet studded with numerous white starry flowers, ht. $\frac{1}{2}$ in.; a valuable plant for rapidly covering bare rock	per doz.	5/6 0 6
AUBRIETIA (Rock Cress), most decorative plants, and valuable for associating with the golden <i>Alyssum</i> and white <i>Arabis</i> , ht. 3 to 4 in.		
Dr. Mules , deep violet-purple	per doz.	5/6 0 6
Fire King , rich crimson	"	5/6 0 6
Leichtlini , deep rose	"	4/6 0 6
Moerheimi , rose-coloured	"	5/6 0 6
olympica , Selected, soft lilac	per doz.	4/6 0 6
Peter Barr , rich glowing purple	"	5/6 0 6
tauricola , soft lilac, very dwarf and compact	"	4/6 0 6
" alba , soft lilac-grey passing to white, very effective.	per doz.	5/6 0 6
AZALEA Mollis —Hardy Deciduous Azaleas. These decorative Azaleas open their flowers in May, and range in colour from soft yellow to fiery orange-red. Beautiful effects can be obtained by associating them with Cottage and Darwin Tulips, especially with such colours as soft lilac, lavender, purple and blackish maroon. They should be planted where they do not get the morning sun until after 10 or 11 o'clock in order to avoid the flower buds being damaged by frosts.		
Mixed Hybrids , strong plants well set with flower buds	per doz.	2/- 2 0
Fine Named Varieties	2/6 &	3 6
CERASTIUM tomentosum (Snow In Summer), foliage silvery grey, flowers white, produced at the end of May, ht. $\frac{1}{2}$ ft.	per doz.	4/6 0 6
MYOSOTIS (Forget-me-not), Barr's Alpine Blue	"	4/6 0 6
dissectiflora , large blue flowers	"	3/- 0 4
Barr's Blue King	"	3/- 0 4
PHLOX subulata (American Moss Pink), covering the ground with a green moss-like carpet, and producing dainty bright-coloured flowers during May.		
annulata , flowers bluish white		0 6
atro-purpurea , rosy crimson	per doz.	5/6 0 6
grandiflora , soft delicate rose-pink		0 6
G. F. Wilson , lovely soft heliotrope-blue	per doz.	5/6 0 6
POLYANTHUS , Barr's Highly coloured large-flowered strain, valuable for bedding		
Barr's large-flowered Yellow and Orange strain , a charming associate for Blue Forget-me-nots and Tulips	per doz.	2/6 —
Barr's large-flowered White strain , very beautiful	"	2/6 —
PRIMROSE , Single English Yellow	"	1/6 —
Barr's Single Blue Shades	"	5/6 0 6
Barr's Highly coloured	per doz.	3/6 0 4
SAXIFRAGAS , Mossy Varieties , forming fresh green mossy carpets covered during May with dainty flower spikes.		
decipiens grandiflora , producing sprays of beautiful white flowers	per doz.	5/6 0 6
Guildford Seedling , flowers crimson-red	"	5/6 0 6
muscolides Rhei superba , deep rose	"	5/6 0 6
trifurcata , flowers white, rapid grower	"	5/6 0 6
TIARELLA cordifolia (Foam Flower), producing little plumes of feathery white flowers from April to June, ht. 6 to 8 in.	per doz.	5/6 0 6
VALERIANA Phu-aurea , foliage during April and May a beautiful clear golden-yellow	"	5/6 0 6

BARR'S VELVETY GRASS PATHS.

A charming feature in well-laid-out Spring gardens are **close velvety grass walks**. They are soft to walk upon, restful to the eye, and provide a delightful contrast to the colours in the flower border.

BARR'S SPECIAL GRASS SEED FOR PATHS has been found a great success per lb. 2/6

Hardy Bulbs & Plants.

For extensive planting in Shrubberies, Wild Gardens,
Woodlands, Grass Lands, etc.

CROCUSES NATURALISED IN GRASS IN A LONDON PARK.

A Few Remarks on Naturalising Bulbs in Grass, etc.

This fascinating phase of gardening deserves more attention than has hitherto been bestowed upon it. No sight is more delightful than the fresh brightness of spring-flowers growing freely in grass land or lending colour to woodland walks, hedgerows, and ditches, here and there nestling at the foot of trees, or establishing themselves on sloping banks.

For naturalising in grass spring flowers are especially suitable, as they bloom and are over before the grass grows tall enough to hide their beauty. Amongst our spring-flowering bulbs there are many gems which refuse to grow in cultivated borders, but when planted in grass, where they enjoy a cooler and more even temperature, they soon become established, and multiply freely until a regular colony is formed which greatly adds to the charm of the landscape.

All formality of arrangement should be avoided, the bulbs being scattered freely from the hand and planted where they fall. Large irregular breaks of one kind of bulb should be made in order to obtain the finest effect.

In planting under trees select spots where the soil is deepest and where the drip is least.

Those whose gardens are of limited size might make them very beautiful in spring, by utilising the fringes of their lawns and any grassy mounds or shady shrubbery walks for such spring favourites as Daffodils, Anemones, Scillas, Crocuses, Chionodoxas, etc., reserving the borders for summer- and autumn-flowering herbaceous plants.

In large gardens and parks ample opportunities are afforded for naturalising spring-flowering bulbs, and very beautiful results may be attained in this way.

In planting bulbs *in grass* Barr's Bulb Planter (see page 95), should always be used. It cuts out a clean piece of turf, leaving a hole to receive the bulb, and on making the second cutting clears itself of the first piece of turf, which lies ready at hand for covering the bulb. This handy implement saves an immense amount of time, and does not, as with an ordinary dibber, leave a hard resting-place for the bulb, while by its use the grass is not in the least disturbed. Planting should not take place while the ground is hard, but after the first autumn rains.

Among the many gems which lend themselves to wild gardening and naturalising, we would specially mention the following:—

Wood Anemones (see page 18), including the exquisite *Anemone Robinsoniana* and the deeper blue and slightly taller *Anemone apennina* and *blanda*; one must see these lovely flowers nestling in grass or against the roots of large trees, to appreciate them fully.

Alliums (page 14). Amongst these we would mention *Allium Moly*, with its bright yellow flowers, thriving anywhere; also the graceful little *Allium neapolitanum*, so useful for shady corners.

Anthericums (see below), very graceful and decorative in grass.

Asphodeline luteus and **Asphodelus ramosus** (page 13), two fine plants for naturalising in grass.

Ornithogalums (page 65), flowering freely anywhere, and producing a very beautiful effect when dibbled in on banks and blended with Tulips, Muscari, etc.

Tulips. These may often be naturalised on banks where, in the same locality, if planted on the level they die out. *Tulipa sylvestris* and the dainty little *Tulipa persica* may be naturalised almost anywhere; the **May-flowering Cottage Tulips** (page 76) should be freely used for naturalising, especially *Picotee*, *Parisian Yellow*, *macrospila*, *Gesneriana*, *Bouton d'or*, etc. Plant at least 6 to 9 inches deep. All Tulips thrive best in partial shade and where sheltered from keen winds.

Wood Hyacinths (**Late-flowering Scillas**) (page 68) should be planted freely in shady walks; they soon make themselves at home and seed plentifully, with the result of much beautiful variation in form and character. Under pine and fir trees they may be naturalised with success.

Fritillaries (page 29). The purple and white Snakeshead Fritillaries (*F. meleagris*) are found growing wild in a few districts in England, and thus seen form a charming picture, full of grace and beauty. For shady corners they will be greatly appreciated, also when naturalised in grass.

Dog's Tooth Violets (*Erythronium dens-canis*, page 28) are lovely little subjects for shady places where the grass is not too rank.

Crocuses. In grass the bright fresh colours of spring Crocuses contrast charmingly with their carpet of green. The beauty of *C. speciosus* (page 26) in September must strike every observer, while *C. Tommasinianus* (page 26) produces a lovely effect in February and March.

Chionodoxas (page 22) are amongst the most beautiful of early blue flowers, and should be largely used where the grass is kept short and not allowed to grow too coarse. *C. Luciliae* and *sardensis* are followed by the beautiful *C. grandiflora* and *Tmolusii*.

Scillas, early-flowering (page 67), *sibirica* varieties and *bifolia* varieties, etc., all charming little subjects for naturalising.

Muscari (page 62) "**Heavenly Blue**" may be termed the **QUEEN OF BLUE FLOWERS**; for a distant effect, massed on grassy banks or grouped for colour, it has no equal. *M. botryoides caruleum* and its varieties, flowering earlier than *Heavenly Blue*, are also charming little subjects to naturalise.

Daffodils. For these favourite flowers, we refer readers to our **Daffodil Catalogue**.

System of Planting, Arranging, etc.

In the grouping of Bulbs for naturalisation avoid anything approaching formality, and let the arrangement be a free and unconventional one. A good plan is to scatter the bulbs loosely from the hand and plant them where they happen to fall, thus forming irregular sweeps and breaks of colour here and there.

THE SYSTEM OF PLANTING.—For planting bulbs in grass we have had a **Bulb Planter** specially made, and by its use much time is saved and the turf is not spoilt. *Particulars* as to its use are given on page 95. In shrubby borders and in hard ground our special **Bulb Dibber** should always be used, the planting taking place after the first autumn rains; a hole is made the requisite depth, some fresh soil put in, and then the bulb inserted, after which the hole is filled up.

IN SELECTING POSITIONS the first consideration should be what best suits the subjects to be planted: too often shade-loving plants are found struggling for existence in full sun, and *vice versa*. In the following pages at the heading of each family we indicate as far as possible its cultural requirements. In planting beneath trees select spots where the soil is deepest and the drip least, which means avoiding the main branches or arms.

CUTTING OF GRASS.—It is advisable that this be done as late in September as possible, so as to ensure it being short at the time the bulbs flower. In meadowland Spring-flowering bulbs in no way affect the hay crop, which may be cut at the usual season.

§ indicates those flowers which will thrive in shady places, under trees, on shady banks, etc., or may be planted in the open border.

* indicates those bulbs, etc., which are essentially wood plants, and should only be grown in shady situations.

For full descriptions see pages 14 to 88 and pages 88 to 93.

DESCRIPTIVE LIST OF The Best Bulbs, Tubers, etc. FOR ALL SEASONS AND CLIMATES.

ALPHABETICALLY ARRANGED FOR EASY REFERENCE.

IN the following pages we give descriptions, as far as space permits, of the various Bulbs, etc., with general notes as to their cultural requirements. The illustrations are mostly reproductions, on a greatly reduced scale, of photographs taken at our Nurseries.

Great care is taken in the selecting of our Bulbs, these being drawn from the best bulb farms only. High-class Daffodils and Tulips, etc., also many rare and beautiful bulbous plants, *we are ourselves large growers of.*

Those bulbs and tubers marked thus × ripen late and are sent out from the middle of October to March. All other bulbs, etc., are ready for despatch in September. Orders which embrace earlier and later ripening bulbs, etc., will be executed therefore in two parts.

- each—s. d.
- × **ABOBRA viridiflora**, an elegant *scarlet-fruited* half-hardy perennial climber; plant outdoors in Spring and lift the tubers in Autumn, storing them in dry sand in a cool place away from frost per doz. 5/6 o 6
- × **ACHIMENES**, a charming family of plants with brilliantly coloured elegant flowers making a very pleasing decoration in the greenhouse from early Summer onwards; in colour they range from vermilion and scarlet to rose, lavender-blue, and white, etc. Pot in rich light soil in Spring (5 roots to a 5-inch pot) and plunge in a gentle bottom heat; when in bloom they may be removed to any ordinary greenhouse or conservatory.
- 5 each of 10 distinct varieties, 10/6; 5 each of 5 distinct varieties, 5/6
- Beautiful Hybrids, mixed, containing a great variety of charming colours
per 100, 10/6; per doz. 1/6 —
- tubiflora** (*syn. Dolichodeira*), a valuable but little known pot-plant for greenhouse, bearing trusses of long tubular white flowers which have a delicious fragrance ...per doz. 5/6 o 6
- ACONITE—Winter.** See Winter Aconite.
- AGAPANTHUS (African Lily).** See Spring Bulb List.
- × **ALBUCA Nelsoni**, a lovely bulbous plant from the Cape, producing in July and August handsome spikes of almond-scented pure white flowers, with brown stripe down petal (under glass *pure white*), ht. 3 ft.; plant out of doors under a south wall in Spring, and lift the bulbs in Autumn. It may also be potted up in Autumn for greenhouse culture...per doz. 7/6 o 8
- ALLIUM**, a decorative and showy family of hardy Spring- and Summer-flowering bulbs, valuable alike for borders or rockwork and for naturalising in woods, etc. They are Spring-flowering except where otherwise stated.
- acuminatum**, with beautiful soft rosy lilac flowers in umbels, ht. 1 ft. per doz. 1/6 o 2
- „ **Murrayanum**, bearing umbels of bright rosy violet flowers, ht. 1 ft. „ 2/6 o 3
- albo-pilosum**, a striking species with large heads of lilac flowers and downy white foliage
per doz. 6/6 o 7
- azureum**, handsome intense blue flowers in July, quite hardy, ht. 2 ft..... „ 3/6 o 4
- descendans**, producing in July heads of dark red-purple flowers, ht. 2 ft..... „ 3/6 o 4
- giganteum** (*syn. nobile*), a handsome rare species with heads of greyish lilac flowers, ht. 3 ft. 3 6
- karataviense**, a remarkably handsome plant, with very large broad glaucous-green foliage spreading close to the ground, and bearing large globular heads of reddish lilac flowers, ht. $\frac{1}{2}$ ft. per doz. 2/3 o 3
- Moly** (Golden Garlic), showy bright yellow flowers in large handsome umbels, valuable for flower borders and naturalisation, ht. 1 ft. per 1000, 21/-; per 100, 2/3; per doz. 4d. —
- neapolitanum**, an elegant bouquet flower largely grown for the market, producing numerous heads of graceful white flowers; it is a charming plant to naturalise in shady woods, associated with the blue Wood Hyacinth, ht. 15 inches per 100, 3/6; per doz. 6d. —
- Ostrowskianum** (*syn. oreophyllum*), a charming species from Asia Minor, with large heads of beautiful rose-coloured flowers, valuable for the rock garden and flower border, ht. $\frac{1}{2}$ ft. per 100, 4/6; per doz. 8d. —

ALLIUM—continued.

each—s. d.

pedemontanum (<i>syn. narcissiflorum</i>), rose-purple, drooping bell-shaped flowers in clusters, beautiful and very distinct, ht. $\frac{3}{4}$ ft. AWARD OF MERIT R.H.S. 1901 ...per doz.	4/6	o	5
pulchellum , graceful heads of bright rosy purple flowers, in July, ht. $\frac{3}{4}$ ft.	5/6	o	6
flavum , small canary-yellow flowers in graceful drooping umbels, very charming, July-flowering, ht. $\frac{3}{4}$ ft.	3/6	o	4
Rosenbachianum , producing large round heads of purple-rose flowers, a very showy variety, ht. $2\frac{1}{2}$ ft.	5/6	o	6
roseum , bearing umbels of bright rose-coloured flowers, ht. 1 ft. ... per 100,	5/6 ;	..	10/-
triquetrum , white, striped green, pretty drooping umbels, ht. 1 ft.	12/6 ;	..	1/9
zebdanense , producing umbels of pure white flowers on slender erect stems, in May, ht. $1\frac{1}{2}$ ft.	per 100, 21/- ; per doz.	3/-	o 4

Many other species of *Alliums* can also be supplied.

- × **ALSTRÖMERIA**, these beautiful "**Peruvian Lilies**" are easy to cultivate, and produce in Summer abundance of showy attractive flowers, which last long in water when cut. They like a well-drained light soil and a sunny situation. *Aurantiaca*, *chilensis*, and *lutea* produce a most brilliant effect in the flower border. Plant with the top 6 inches below the surface, by preference close to a south wall or hedge, and protect, the first Winter, with leaves or litter. They should be allowed to remain undisturbed, so as to become well established. *Pelegrina*, *Pulchra*, and *Revoluta* are more tender, and delight in hot dry sunny situations, such as under a south wall, and require protection each winter; they also make fine plants for a cool greenhouse.

aurantiaca (<i>syn. aurea</i>), handsome flowers ranging from rich to dark orange, spotted carmine, very showy and valuable for cutting; it should be grouped in every herbaceous border, ht. 3 ft.	per 100, 7/6 ; per doz.	1/3	o 2
chilensis hybrida, mixed , beautiful shades of rose, crimson, yellow, buff, and bluish, with orange-yellow and crimson markings, ht. 2 ft.	per 100, 7/6 ; per doz.	1/3	o 2
Erembaulti , bright rose with green markings, interior of flower conspicuously flaked blood-crimson on a bluish ground, ht. 2 ft.	per doz.	7/6	o 8
lutea , bright yellow flowers spotted carmine, very pretty, ht. 3 ft. ...per 100,	9/6 ;	..	1/4
pelegrina alba , white, very chaste and beautiful, ht. 1 ft.	12/6 ;	..	1/9
rosea , rose, beautifully spotted, ht. 1 ft.	12/6 ;	..	1/9
psittacina (The Parrot Flower), bright crimson, splashed green and mahogany, ht. 2 ft.	per 100, 9/6 ; per doz.	1/4	o 2
pulchra (<i>syn. tricolor</i>), white and yellow, blotched crimson, ht. 1 ft.	per 100, 15/- ;	..	2/3
revoluta , a handsome variety, producing large heads of orange-red flowers	3/6	o	4

- × **AMARYLLIS (Hippeastrum), choice Greenhouse Varieties.** These are magnificent in the conservatory, and with management may be had in bloom for many months.

CULTURE.—Pot up the bulbs from December to March, and plunge the pots to the rim in a gentle, steady, moist bottom heat; thus treated, a vigorous leaf-growth is produced, and a strong stem with a fine umbel of large flowers secured. In the absence of bottom heat they do well in an ordinary greenhouse or sunny sitting-room window if potted up in February.

Barr's Choice Unnamed Hybrids, purchasers are sure to be satisfied with the flowers, and have a good chance of getting new varieties of exceptional beauty per doz. 25/- ; Each 2/3

Magnificent Large-flowered Named Amaryllis.

ANEMONES, Various Beautiful Species for Autumn Planting.

ANEMONE BLANDA.

Where Daffodils are naturalised the following Anemones should be freely used:—*Anemone apennina*, the blue Mountain Windflower, forms a dense cushion of rich blue and is one of the loveliest of dwarf Spring flowers. *A. blanda* resembles *A. apennina* in flower, but blooms a month earlier. The varieties of *Anemone nemorosa* (the true Wood Anemone), being shade-loving plants, should be under trees or in shady nooks on rockwork; naturalised in grass they present a picture full of grace and beauty. *A. palmata* likes a damp spot during summer. For other beautiful Anemones, see our **Hardy Plant Catalogue.**

each—s. d.

apennina, beautiful single sky-blue flowers, as large as a half-crown, a gem for the rock-garden or shady border, ht. $\frac{1}{2}$ ft.

Extra fine roots, per 1000, 40/-; per 100, 4/6; per doz. 8d. —

“ **alba**, flowers white, very beautiful, ht. $\frac{1}{2}$ ft. “ 5/6; “ 10d. 0 2

„ "Blue Bonnet," the largest flowered blue Wood <i>Anemone</i> , later to bloom than the other Wood <i>Anemones</i> , very pretty, ht. $\frac{1}{2}$ ft.	per doz. 8/6	0 9
„ rosea fl. pl. , a very lovely variety with semi-double pink flowers, ht. $\frac{1}{2}$ ft.	per doz. 7/6	0 3
„ Robinsoniana , large single flowers, pale lavender, one of the most beautiful of the Wood <i>Anemones</i> , which should be freely naturalised in woodlands, on shady banks, rockwork, etc., ht. $\frac{1}{2}$ ft.	per 100, 21/-; per doz. 3/-	0 4
„ Vestal , flowers large, pure white, very lovely, ht. $\frac{1}{2}$ ft.	„ 5/6	0 6
palmata , characteristic heart-shaped foliage and glossy golden-yellow flowers, ht. $\frac{3}{4}$ ft.	per doz. 3/-	0 4
„ alba , flowers pure white, with golden-yellow stamens, beautiful, ht. $\frac{3}{4}$ ft.	per 100, 12/6; per doz. 1/9	0 2
ranunculoides (The Yellow Wood <i>Anemone</i>), a very pretty little dwarf species, bearing golden-yellow flowers in March and April, ht. $\frac{1}{2}$ ft.	per 100, 5/6; per doz. 10d.	—
× ANOMATHECA cruenta. See our Spring Catalogue of Bulbs and Tubers.		
× ANTHOLYZA , handsome showy bulbous plants from the Cape, which may be grown in pots or out of doors under a south wall.		
æthiopica , bearing in summer elegant spikes of red and yellow tubular flowers, ht. 3 ft.	per doz. 3/6	0 4
crocsmioides , a fine hybrid of <i>A. paniculata</i> × <i>Crocsmia</i> , bearing in September elegant spikes of brilliant reddish orange flowers, very robust grower, ht. 3 ft.	per 100, 5/6; per doz. 10d.	—
paniculata major , a handsome plant bearing spikes of deep crimson flowers.	per 100, 21/-; per doz. 3/-	0 4
× APIOS tuberosa , a rapid-growing elegant hardy deciduous climber, for arbours, trellises, etc., delighting in a sunny situation and a light sandy soil; the flowers are brownish purple striped black and deliciously scented, the foliage light and graceful; grow in pots or plant out from March to April	per doz. 2/6	0 3
ARUM , curious and interesting plants, more or less handsome. They should be given choice spots in the border or on rockwork. As pot-plants they are very ornamental.		
cornutum (<i>syn. Saurodatum guttatum</i>), The Monarch of the East. See our Spring Catalogue of Bulbs and Tubers.		
dracunculus (Dragon <i>Arum</i>), large purple-red and black-blue flowers, marbled stem, very handsome	large bulbs, per doz. 3/6	0 4
italicum , leaves spotted and flowers greenish white, followed by handsome spikes of scarlet berries in autumn	per 100, 5/6; per doz. 10d.	—
All other species of <i>Arums</i> in commerce can also be supplied.		
ARUM LILY, or Calla. See <i>Richardia</i> .		
× ASPARAGUS medeoloides (<i>syn. Smilax</i> and <i>Medeola</i>). See Spring Bulb List.		
ASTILBE chinensis Davidii. See page 88.		
„ japonica. See <i>Splœa japonica</i> , page 93.		

BABIANA (Baboon-root), the flowers range in colour from blue to the richest crimson-magenta, and are set off by a dark green hairy foliage. They have a fine dwarf compact habit, and are of great value for pots, rockeries, or the front of borders. Culture same as for the *Ixia*.

Extra Choice mixture, of many beautiful colours.....per 100, 10/6; per doz. 1/6

× **BEGONIAS, BARR'S GIANT-FLOWERED SINGLE.**

Separate Colours for Bedding, fiery salmon-scarlet, glowing vermillion-scarlet, velvety dark blood-crimson, soft rose, salmon, white, and pure canary-yellow, flowers large and handsome.....each colour, per 100, 25/-; per doz. 3/6

Choice Mixture for Bedding, all colours....., 18/6; ,, 2/8

Separate colours, extra selected tubers, for pot culture....., 5/6

Barr's Choice Exhibition Varieties, for pot culture, all having a fine stiff erect habit and large round-petalled flowers of finest form and substance, cannot be surpassed, 12 in 12 distinct colours, 10/6 and 21/-

× **BEGONIAS, BARR'S LARGE-FLOWERED DOUBLE.**

Separate Colours for Bedding, white, fiery salmon-scarlet, brilliant dark vermillion, glowing orange-scarlet, salmon-buff, soft canary-yellow, and brilliant rose, flowers large and handsome.....each colour, per 100, 32/6; per doz. 4/6

Choice Mixture for Bedding, all colours....., 25/-; ,, 3/6

Separate colours, extra selected tubers, for pot culture....., 7/6

Exhibition, Camellia-Flowered Varieties, a grand strain, flowers of beautiful form, equalling *Camellias* in symmetry; colours—coral-pink, bluish, yellow, cream, scarlet, etc. 12 in 12 distinct colours, 17/6, 25/- and 35/-

× **BEGONIAS.**

New Large-flowered Single Fringed, a beautiful new race, with very large handsome flowers borne on stiff erect stems well above the foliage, the petals having their edges elegantly crimped and fringed; they are freer blooming than either the double or single *Begonias*, and we can strongly recommend them for bedding or for pots.

Separate Colours, dark vermillion, salmon, coral-rose, pale blush-pink, primrose, and pure white.....each colour, per 100, 30/-; per doz. 4/-

Mixed shades of colour....., 21/-; ,, 3/-

New Crested Begonia, Mixed Shades, a very beautiful distinct strain, flowers elegantly fringed and heavily crested, colours ranging from scarlet, rose, orange, salmon, and primrose to pearly white and pure white. Specially suitable for pot culture per doz. 5/6

For other varieties of *Begonias* see our *Spring Catalogue of Bulbs and Tubers*.

BELLADONNA & GUERNSEY LILIES. See *Amaryllis*, page 15, *Nerine*, page 64.

× **BESSERA elegans** (Coral Drops). See our *SPRING BULB LIST*.

BLETIA hyacinthina, a charming Chinese Orchid, with a pretty ribbed foliage and graceful racemes of deep rose-pink flowers; it thrives in the bog garden and sheltered shady situations planted in peat per doz. 5/6 each.
s. d.
0 6

,, ,, **alba**, a lovely white-flowered variety of the above, requiring same treatment per doz. 7/6 0 8

BLOOMERIA aurea, producing in June beautiful umbels of golden-yellow flowers, striped brown, a fine showy flower for beds and borders, ht. 15 inches; it likes a light rich soil per doz. 3/- 0 4

× **BOUSSINGAULTIA baselloides** (The Madeira Vine). } See our *SPRING BULB LIST*.

× **BRAVOA geminiflora** (Scarlet Twin-flower).

BRODIAEA (Californian Hyacinth), a very beautiful family of hardy bulbs, well deserving a place in every choice border, or for select nooks on rockwork. June-July flowering. When planting surround the bulbs with sharp sand.

californica (*syn. Austinae*), the largest-flowered of all the *Brodieas*; flowers of a delicate heliotrope shade of colour, borne in graceful umbels, ht. 15 in. per doz. 5/6 0 6

candida, bearing umbels of large flowers, very pale blue, almost white, a handsome border plant, ht. 1 ft. per doz. 10/6 1 0

coccinea (Scarlet Fire-Cracker of California), a remarkably handsome plant bearing graceful umbels of long tubular blood-red flowers, tipped green, 1½ ft. ...large bulbs, per doz. 4/6 0 5

congesta, lilac flowers in rosettes, valuable as a cut flower, 2 ft., per 100, 5/6; ,, 10d. —

gracilis, flowers of the form of *B. laxa*, but of a bright yellow colour 7/6 0 8

grandiflora, a most valuable dwarf early Summer flower for edgings, masses, etc., colour bright blue, ht. ½ ft..... per 100, 5/6; per doz. 10d. —

Hendersonii, bearing umbels of attractive yellow flowers with purple band down centre of petal per doz. 6/6 0 7

Howellii lilacina, bearing clusters of elegant tubular flowers, pale lavender, tipped white, remarkably beautiful. FIRST-CLASS CERTIFICATE R.H.S.....per doz. 8/6 0 9

BRODIAEA—continued.

each—s. d

hyacinthina, an elegant species bearing at the top of a tall wiry stem an umbel of many papery flowers, opening milky white with small green stripe and dying off lilac, ht. 1½ ft. per 100, 8/6; per doz. 1/3 —

Ixioides splendens, a very handsome and beautiful variety bearing large umbels of light yellow flowers per doz. 4/6 o 5

laxa (*syn. Tritelleia laxa*), large rich Tyrian purple flowers, very handsome, ht. 1 ft. per 100, 8/6; per doz. 1/3 o 2

multiflora, producing in June an umbel of pretty waxy deep lilac flowers of star-like form, ht. 18 in. per 100, 10/6; per doz. 1/6 o 2

Murrayana, large deep violet-blue flowers. very handsome; a free grower and a good bulb to naturalise, ht. 9 in. per doz. 5/6 o 6

volubilis (The Twining Hyacinth), a lovely twining species, bearing a terminal cluster of pretty light rose-coloured flowers; a light covering during Winter is advisable. Very pretty in hanging baskets per doz. 7/6 o 8

BULBOCODIUM vernalum, producing early in Spring a mass of bright rose-purple flowers, valuable for edgings, rockwork, and naturalising in grass, ht. ½ ft. per 100, 12/6; per doz. 1/9 o 2

× **CALADIUMS**, perhaps the most beautiful and picturesque of foliage stove plants.

12 beautiful named varieties, 15/-, 24/-, 30/- & 42/-; 6 ditto, 8/6, 12/6, 16/- & 22/-

GALLA, or **Arum Lily**. See *Richardia*.

CALOCHORTUS, or more popularly known as the **Butterfly** or **Mariposa Tulips**, **Globe Tulips** and **Star Tulips**. These lovely Californian bulbs, although belonging to the same Natural Order as the Tulips of our gardens, bear little resemblance to them. They flower through June and July, and for delicacy of texture and brilliancy of colour are unsurpassed; they deserve a place in every hardy flower border and rock garden.

BUTTERFLY TULIPS (CALOCHORTUS VENUSTUS VAR.)

The *Mariposa* or *Butterfly* Tulips are especially valuable for cutting, having long stems and being profuse continuous bloomers.

CULTURE OUTDOORS.—The *Calochorti* are all quite hardy. The “*Mariposa*” and “*Star Tulips*” require a sunny position and light gritty or sandy soil on slightly raised beds to ensure perfect drainage; plant from September to end of November, 2 to 3 inches deep, and 3 inches apart. Cover the beds after planting with straw or cut heather, to keep surface sweet and as a protection in case of early growth; remove the covering in March. A position facing south and sunny spots on the rockery are specially suitable. When in full growth give occasional soakings of water, but not too frequently. After flowering, ripen off by placing glass over them, and take up when foliage dies down.

The “*Globe Tulips*,” being woodland plants, like partial shade and a porous soil composed principally of leaf mould.

CULTURE IN POTS.—The *Calochorti* all make charming pot plants (three or four bulbs in a pot), and are easily grown in a cold greenhouse or cold frame with south aspect.

Selections of Calochorti, from Sections I., II., and III.:

3 each of 12 beautiful varieties 7/6, 12/- & 18/-
 1 “ “ 12 “ “ 3/-, 4/6 & 6/6

⚠ In the following List the numbers after the names indicate their relative order in time of flowering: thus those marked (1) are the earliest to bloom, and those marked (6) the latest. The heights we give are an average; under exceptionally good or poor conditions the plants may grow taller or dwarfer.

SECTION I.—BUTTERFLY OR MARIPOSA TULIPS

all of remarkable beauty, with large open flowers.

each—s. d

Catalinae (2), the earliest of all the *Mariposa Tulips*, bearing on tall slender stems very beautiful large flowers ranging from pale to deep lilac, with a dark maroon circle at base, ht. 16 to 24 in. per doz. 8/6 o 9

Gunnisoni (4), large pure white expanded flowers, with an inner hairy zone of green and gold, petals shaded outside green and azure, of great beauty, ht. 18 to 24 in., fine for cutting. AWARD OF MERIT R.H.S. per doz. 6/6 o 7

CALOCHORTUS—BUTTERFLY TULIPS—*continued.*

each—s. d.

Kennedyi, a most lovely species, with flowers of a brilliant brick-scarlet with black central blotches, ht. 6 to 10 in. Plant in a warm sunny situation in a stony or gravelly soil

macrocarpus (4), a splendid species, bearing very large flowers of a beautiful pale lavender, with dark centre banded green, ht. 12 to 18 in. AWARD OF MERIT R.H.S. per doz. 12/6 1 3
per doz. 7/6 0 8

nitidus (4), bearing several large flowers, white flushed lilac, each petal covered with long hairs, and having a bold indigo blotch, beautiful, ht. 15 to 18 in. per doz. 3/6 0 4

Plummeræ (4), bearing a branching spike of beautiful large soft lavender flowers, lined with long silky golden hairs, ht. 12 to 18 in. FLORAL CERTIFICATE R.H.S. ...per doz. 7/6 0 8

splendens atro-violaceus (5), having handsome brilliant purple flowers, with deep red blotch on petal, free-flowering, ht. 24 to 30 in. per doz. 4/6 0 5

" **ruber** (4), bearing on tall slender stems large showy flowers of an exquisite lilac shade with purplish red centre, and covered with silky hairs, very beautiful. ht. 16 to 30 in. per doz. 6/6 0 7

Venustus group, all having flowers of exquisite beauty, large and elegantly formed, valuable for cutting; *these are all robust growers.*

" **citrinus** (4), large flowers of a beautiful clear bright yellow, with conspicuous dark maroon blotch on middle of each petal, centre finely speckled maroon, and with a cushion of golden hair, of *exquisite beauty*; a gem for cutting, ht. 16 to 24 in. FIRST-CLASS CERTIFICATE ...per 100, 12/6; per doz. 1/9 0 2

" **El Dorado** (3), flowers varying in shade from white and cream to lilac, deep velvety purple and rosy purple, red, pink, and salmon, all having the centre exquisitely blotched and speckled soft brown and golden-yellow, while some have a beautiful golden blotch on each petal, of sturdy growth, ht. 1½ to 2 ft. AWARD OF MERIT R.H.S. per 100, 21/-; per doz. 3/- 0 4

" **oculatus**, a most beautiful variety, forming very long dark rose-coloured buds opening white with very dark blotch on petal, margined yellow, centre beautifully marked, exterior of flower rosy purple. AWARD OF MERIT R.H.S. per 100, 15/-; per doz. 2/3 0 3

" **purpurascens** (4), a lovely variety, flowers large, outside purplish, inside creamy white, each petal handsomely blotched, very free-flowering, ht. 12 to 24 in. AWARD OF MERIT R.H.S. per doz. 4/6 0 5

" **roseus**, flowers white, with carmine-rose on back of petals, inside having rosy red blotches and a rich maroon centre, beautiful, ht. 12 to 28 in., per doz. 3/6 0 4

" **Vesta** (4), a lovely variety and one of the freest growers; flowers large, and borne freely on long stalks, colour outside rose-purple, inside creamy white, with a broad halo of crimson-maroon and below this crimson-brown pencilling on a lemon ground, ht. 20 to 30 in., *extra large bulbs*, per doz. 5/6 0 6

mixed Butterfly or Mariposa Tulips. Everyone should grow these gems either in the open ground, on rockwork, or in pots. per 100, 12/6; per doz. 1/9 —

SECTION II.—GLOBE TULIPS OR FAIRY BELLS.

These are the perfection of grace, with beautiful globular drooping flowers; charming little subjects for half shady nooks on rockwork. They were formerly known as *Cyclobothras*.

albus (*Fairy Lamp*) (3), a species from the Sierras, bearing on branching stems several pearly white hairy flowers, which hang in pendent globes, ht. 12 to 14 in. ...per doz. 2/- 0 3

" **The Pearl**, a species from the Coast Range, bearing larger and handsomer flowers of a pearly white, tinged pink and brown, very globular. per doz. 3/6 0 4

amabilis (2), bearing a quantity of golden globe-like pendent flowers, margins fringed with hair, dwarf and beautiful; of easy culture, ht. 8 to 10 in. per doz. 2/3 0 3

amœnus (*Pink Globe Tulip*) (2), a lovely new species, bearing lovely pendent globe-shaped flowers of a beautiful rose colour, ht. 6 to 8 in. FLORAL CERTIFICATE R.H.S. per doz. 5/6 0 6

pulchellus, true, a lovely species, with flowers twice the size of *C. amabilis* and of finer form, colour delicate pale lemon. per doz. 6/6 0 7

mixed Globe Tulips or Fairy Bells per 100, 12/6; " 1/9 —

SECTION III.—STAR TULIPS.

These produce dainty open cups on slender dwarf stems, and are of exquisite beauty. On rockwork they are very charming.

Benthami (1), bright yellow with dark blotch at base, and covered with yellow hairs, ht. 4 to 6 in. per 100, 14/6; per doz. 2/- 0 3

Howelli, a fine *Giant Star Tulip*, with large pale straw-coloured flowers, ht. 12 to 15 in. per doz. 15/- 1 6

lilacinus (1), a beautiful dwarf species bearing numerous large pale lilac flowers, with or without a dark blotch, of easy culture, ht. 6 to 10 in. per doz. 2/- 0 3

Maweanus, var. roseus, having large open cup-shaped flowers, white flushed rose, densely covered with silky hairs, ht. 8 to 10 in. per doz. 3/6 0 4

CALOCHORTUS—STAR TULIPS—*continued.*

each—s. d

Maweanus, var. major (2), a very lovely species bearing large open cup-shaped white flowers covered with silky blue hairs, ht. 8 to 10 in. per doz. 3/6 o 4

Purdyi (3), a very beautiful species of easy culture; it produces stems 10 to 15 inches high, well furnished with very large erect white flowers tinted mauve and green and covered inside with long hairs. FIRST-CLASS CERTIFICATE R.H.S. per doz. 5/6 o 6

mixed Star Tulips, gems for the rock-garden per 100, 12/6; „ 1/9 —

CAMASSIA (The Quamash), graceful hardy bulbous plants flowering from the end of May to June, charming in flower borders and valuable to naturalise.

Cusickii, forming a handsome rosette of broad glaucous foliage, from which rise tall spikes of large pale lavender starry flowers with yellow anthers, ht. 2 to 3 ft. per doz. 7/6 o 8

esculenta, producing spikes of pretty star-shaped blue flowers, ht. 1½ ft.; charming when naturalised in grass per 100, 3/6; per doz. 6d. —

„ **alba**, having spikes of pretty star-shaped flowers, lavender and white, ht. 1½ ft. per doz. 5/6 o 6

„ **Royal Purple**, a grand form of *C. esculenta*, bearing large flowers of a rich dark purple-blue shade, ht. 1½ ft. per doz. 3/6 o 4

Fraseri, a distinct species from California, with pretty delicate pale blue flowers, ht. 1 ft. per 100, 8/6; per doz. 1/3 o 2

Leichtlini, bearing elegant spikes of large starry flowers running from white to cream, and having handsome dark glaucous foliage, ht. 2 ft. per doz. 6/6 o 7

New seedling varieties, a very pretty strain, containing many beautiful shades of blue, lavender, French white, etc., flowers large and handsome, very decorative when grouped in beds and borders, ht. 2 ft. per 100, 25/-; per doz. 3/6 o 4

CANNAS. See our *Spring Catalogue of Bulbs and Tubers.*

CHINESE SACRED LILY. See *Narcissus Polyanthus*, page 64.

CHIONODOXA (Glory of the Snow). The *Chionodoxa* is one of our loveliest Spring flowers, and when established its sheets of blue in very early Spring are a great attraction in the garden. It should be largely used in borders and dotted over bulb beds, also massed on rockwork. Once planted it comes up year after year, the flower spikes increasing in size and beauty. When associated with *Narcissus minimus*, the effect is very charming. For an effect the first season, plant the bulbs close together. The *Chionodoxa* may be grown also in pots and vases and had in bloom early in January, if brought on in a cold frame or cool greenhouse close to the glass.

Luciliæ (The Glory of the Snow), flowers brilliant blue, with clear snow-white centre. per 1000, 40/-; per 100, 4/6; per doz. 8d.

„ *extra selected bulbs* „ 50/-; „ 5/6; „ 10d.

„ *large bulbs for pot-culture* „ 7/6; „ 1/3

„ **alba**, white flowers of delicate beauty, rare ...per doz. 12/6; each 1/3

„ **rosea**, flowers ranging from delicate rose to rose-lilac, beautiful and rare „ 15/-; „ 1/6

sardensis, one of those rare flowers of a true *Gentian-blue*, and so striking that for distant effect it cannot be too highly recommended per 1000, 35/-; per 100, 4/-; per doz. 7d.

„ *extra selected bulbs* „ 45/-; „ 5/-; „ 9d.

„ *large bulbs for pot-culture* „ 6/6; „ 1/-

gigantea (syn. C. grandiflora), a very distinct and beautiful species, with large flowers of a beautiful soft lavender-blue per 1000, 40/-; per 100, 4/6; per doz. 8d

„ *extra selected bulbs* „ 55/-; „ 6/-; „ 10d.

„ *large bulbs, for pot-culture* „ 10/6; „ 1/6

„ **alba**, flowers white, very beautiful and rare per doz. 25/-; each 2/3

Boissieri, a grand showy species blooming a shade dwarfier and later than *C. Luciliæ*, flowers large, soft lavender-blue, with very large and striking snowy white centre per 100, 6/6; per doz. 1/-

Tmolusii, a valuable species for succession; it blooms later than *C. Luciliæ*, the blue is more intense and the white centre larger per 100, 7/6; per doz. 1/3

✕ **CLIVIA (syn. Imantophyllum)**, very handsome bulbous plants for conservatory and house decoration. They are easily grown in a temperature of 45 to 55 degrees with a moist atmosphere, but should be kept fairly dry while at rest. each—s. d

cyrtanthiflora, producing umbels of orange-coloured flowers, ht. 2 ft. 5 6

miniata, flowers orange-crimson, very showy, ht. 2 ft. 5/6 & 7 6

COLCHICUM (Meadow Saffron); the great Crocus-like flowers carpet the ground in September and October, with colours ranging from pure white to intense crimson, more or less chequered or tessellated. In flower borders or naturalised in grass they are most beautiful. The foliage does not appear till Spring, and is very varied. If planted in August and early September most of the bulbs will bloom almost immediately; but *C. autumnale* type being a wild collected bulb requires to become established a year before blooming freely. Colchicums should not be planted in grasslands used for grazing.

autumnale type, light rosy purple per 100, 14/6; per doz. 2/- o 3

„ **plenum**, lilac, large and very double „ 16/6; „ 2/4 o 3

„ **album**, pure white „ 14/6; „ 2/- o 3

„ „ **plenum**, pure white, large and very double, scarce „ 25/- 2 3

„ **roseum**, flowers a charming purplish rose colour, a very strong grower and free bloomer, remarkably showy, per 100, 15/-; per doz. 2/3 o 3

COLCHICUM—continued.

	each—s	d
byzantinum , very beautiful rose-coloured flowers, perfect in form, and produced in great profusion	per 100, 25/- ; per doz. 3/6	o 4
cilicicum , large handsome flowers, soft rose chequered deeper rose and shaded crimson	per doz. 4/6	o 5
giganteum (<i>syn. Bornmüllerii</i>), a grand giant species from the Zigana Dagh (Gipsy Mountain), bearing immense expanded flowers of a beautiful soft rose shading to white at base, remarkably handsome. (<i>See coloured plate in "Flora and Sylva," June 1903</i>) doz. 7/6		o 8
Parkinsoni , omitted, as being so shy a bloomer ; we recommend instead variegatum , which is more effective and flowers freely.		
Sibthorpi , a giant species, with very handsome rosy purple chequered flowers.....		3 6
speciosum , large handsome flowers varying in colour from light to bright rosy crimson, petals of great substance	per 100, 30/- ; per doz. 4/3	o 5
" album , a grand new variety with very large snowy white flowers of perfect form, remarkably handsome. AWARDED FIRST-CLASS CERT. R.H.S.	extra large bulbs " 42/- ; " 5/6	o 6

WINTER AND EARLY SPRING-FLOWERING COLCHICUMS.

COLCHICUM CROCIFLORUM.

crociflorum , producing in February small white flowers, lined purple-violet, ht. 3 in. ...per doz. 8/6	o 9
Decaisnei , producing in profusion soft flesh-coloured flowers, November to January, per doz. 5/6	o 6
libanoticum (<i>syn. montanum</i>), producing in early Spring rose and white flowers per doz. 5/6	o 6
× COMMELINA tuberosa (Blue Spiderwort). See our <i>Spring Catalogue of Bulbs and Tubers</i> .	
× COOPERIA Drummondii (Evening Star), a lovely little bulbous plant from Texas, requiring out of doors a sunny sheltered situation and light soil, otherwise a frame or cool greenhouse ; it produces long tubular waxy white flowers slightly tinged red outside, opening in the evening with a delicate primrose fragrance, ht. $\frac{3}{4}$ ft. per doz. 7/6	o 8
CORYDALIS bulbosa , a very graceful little plant for front border and rockwork, producing in April rosy purple flowers, ht. $\frac{1}{2}$ ft. per 100, 5/6 ; per doz. 10d.	—

CORYDALIS Ledebouriana , a beautiful little creeping species from Bokhara, bearing racemes of rosy purple flowers in February and March.....per doz. 10/6	I o
× CRINUM , handsome bulbous plants, with large umbels of funnel-shaped flowers. <i>C. Moorei</i> , <i>C. Powellii</i> , and <i>C. longifolium</i> varieties are hardy in England if planted six or eight inches deep on warm sunny borders, or covered during winter with light litter. <i>C. longifolium</i> is a fine plant for the water's edge or herbaceous border : give plenty of water while in growth. All Crinums require to be established before flowering freely.	
campanulatum (<i>syn. aquaticum</i>), a handsome stove plant with large rosy red flowers ; it should be stood in water whilst growing, ht. 3 ft.	3 6
erubescens , flowers rosy white, outside purple, a handsome stove plant, ht. 2 ft.	6 6
fimbriatum , bearing umbels of very large fragrant flowers, striped white and carmine, requires stove treatment, ht. 2 ft.	2 6
longifolium (<i>syn. capense</i>) and longifolium album . See SPRING BULB LIST.	
Moorei (<i>syn. Makoyanum</i>), bearing fine large blush-rose flowers, a fine handsome variety, ht. 2 ft.	3 6
" album , bearing very beautiful large pure white sweet-scented flowers, very handsome, ht. 2 ft.....	3 6
Powellii , a very handsome species with large rose-coloured flowers, ht. 3 to 4 ft., per doz. 8/6	o 9
" album , bearing very beautiful large pure white flowers, ht. 3 to 4 ft. ,, 12/6	I 3
" intermedium , a very beautiful hybrid, with large pale rose-coloured flowers, ht. 3 to 4 ft.	2 o

CRINUM—continued.

each—s. d

Rattrayi , a splendid species from Central Africa, bearing in umbels very large handsome pure white flowers; a noble stove plant, ht. 20 in.	7	6
yemense , having very large satiny white fragrant flowers; a beautiful plant for warm greenhouse, and may also be grown in warm localities beneath a south wall, the bulbs being planted in spring, ht. 2 ft.	3	6

See also Novelty List, page 7.

× CROCOSMA.

aurea , lighting up the garden in September with its graceful racemes of brilliant reddish orange flowers, which are greatly prized for cutting, ht. 3 ft. The best treatment is to pot up the corms (6 in a 6-inch pot) in November or December, keep them in a cold frame until April, and then plant out in a peaty soil (not too dry) with warm sunny aspect. Unless the district is a cold one they may be left to establish themselves, but during winter a light covering should be given. The <i>Crocospma aurea</i> may also be grown on as a pot plant, and affords a brilliant decoration indoors in autumn.....per doz.	4/6	0	5
imperialis , a grand acquisition, producing in September flowers nearly 4 inches across, and of a fiery orange-red colour; a tall and vigorous grower, and exceedingly showy, ht. 4 ft. FIRST-CLASS CERTIFICATE R.H.S. per doz.	30/-	2	9

CROCUSES.

The *Crocus* is one of the earliest flowers of Spring, and occupies a deservedly prominent place in every garden. Planted as an edging in triple lines of one or more colours, the effect is striking. No Spring display surpasses that of broad wavy bands of golden-yellow, striped, purple, or pure white Crocuses when they expand their blossoms, in February and March. In lawns and pleasure parks, planted in the grass, Crocuses are extremely effective. In wild gardens, woodland walks, etc., the *Crocus* should be associated with the violet, the primrose, and the oxlip.

For outdoors plant as *shallow as possible*, barely covering the bulb; many amateurs plant too deeply, which is often the cause of Crocuses failing to bloom. Early plantings give the best results.

BARR'S CHEAP SHOWY CROCUSES for Large Plantings.

For a gorgeous effect in early Spring nothing can equal large masses of Golden-Yellow or Purple Crocuses, which attract the eye at a great distance. The value of the larger sized bulbs of Yellow Crocuses is that they produce more flowers to a bulb.

BARR'S CHOICE NAMED LARGE-FLOWERED CROCUSES.

Large Bulbs for Pot-Culture and Flower Beds, etc.

The following large-flowered named Crocuses are the best in cultivation, and we can confidently recommend them for planting in groups, edgings, select beds, and in designs. To obtain the finest effect the bulbs should be planted an inch apart. When grown in pots, plant thickly, and plunge the pots in ashes up to the rims only. When removed from under the ashes, place in an airy situation, and give water very freely at the roots. A charming effect is obtained by growing Crocuses in shallow saucers, using Barr's Fertilised Fibre and Shell Mixture, or Pebbles and water (the bulbs touching one another). The saucers should be kept in an airy room without a fire, where gas is seldom burnt and where they can get plenty of light. When the bulbs are coming into bloom they may be brought into the sitting-room.

CROCUSES.

BARR'S AUTUMN-, WINTER- AND SPRING-FLOWERING SPECIES.

No hardy garden is complete without these floral gems, which carry on a continual display of bloom from August to March, and light up the garden with their bright colours in winter when few other plants are flowering. On rockwork and in grass they form a charming picture, while in pots they make a very pretty effect. In nomenclature we have followed Mr. GEORGE MAW'S MONOGRAPH ON THE CROCI. The delightful effect produced by masses of *C. speciosus*, *C. longiflorus*, *C. sativus*, *C. Tommasinianus*, etc., when naturalised, can only be realised by those who have witnessed it.

CULTURAL DIRECTIONS.—Any ordinary garden soil suits these Crocuses. Plant the bulbs as early as possible, and very shallow, barely covering them with soil.

CROWN IMPERIAL. See *Fritillaria imperialis*, page 30.**CYCLAMEN Persicum, for Greenhouse, Large-Flowered Strain**, a great improvement on the old strain; plants are of fine compact habit, with flowers large, of rich and delicate colours, and standing well above the handsome foliage.

Plants in Pots set with bud or in bloom, supplied from September to December—per doz. 15/-, 21/-, 25/-, and 30/-; each 1/6, 2/-, 2/6, and 3/6, according to size.

Seed for November Sowing.....per pkt. 2/6 and 3/6

HARDY CYCLAMEN.**Autumn-, Winter- and Spring-Flowering.**

These **Hardy Cyclamen** require perfect drainage, and shelter from ground winds and the early morning sun; at the bottom of old walls facing north and on rockwork they are very beautiful, or nestling in the grass, near the roots and under the shelter of old trees, they produce a most charming effect; they are also good subjects for fern plantations, where they obtain the shade they like. In making up a soil for the hardy Cyclamen, add a liberal proportion of old mortar rubble with some well-decayed leaf soil and good fibrous loam. These Cyclamen prefer shallow planting with the exception only of *Europæum*, which should be planted 4 to 6 inches deep; they should all have a mulching of well-decayed leaf soil after planting.

Annuals for Autumn Sowing.

List of Hardy Annuals suitable for September sowing in the open for early Spring display, sent on application.

EUCCHARIS amazonica (The White Amazon Lily), the snow-white flowers of this handsome stove-plant are deliciously fragrant, and are much used for bouquets and wreaths, ht. $1\frac{1}{2}$ ft. *Strong bulbs*, per doz. 21/- 2 0

✓ **EUCOMIS punctata**. See our *Spring Catalogue of Bulbs and Tubers*.

FREESIA. Freesias are prized for their delightfully fragrant graceful flowers, which last longer in water than almost any other flower. Pot up the corms from August to October, 6 in a 5-inch pot, or 12 in a 7-inch to make a better display. The tops of the bulbs should be buried 2 inches below the surface of the soil, which should be a compost of good mellow loam, well-decayed farmyard manure and a little bonemeal. Care must be taken that there is good drainage. Stand the pots outside on a sunny border and keep them slightly shaded until growth is showing, when expose them to full sun and keep them in continuous growth, giving water when dry. Before severe frost comes on, remove the pots to the sunny part of a greenhouse and give plenty of air (avoiding draught). Or they may be placed in an airy, sunny window, care being taken not to expose them to draught or the drying heat arising from gas. When the flower buds are opening, a little weak liquid manure water will be found beneficial. If required for Christmas decoration the corms should be potted up in August, grown out of doors as described above, and about the beginning of December gently forced.

FREESIA REFRACTA ALBA.

Chapmanii, a beautiful hybrid Freesia, a cross between *F. aurea* and *F. refracta alba*, bearing elegant racemes of flowers of a soft yellow with golden shading and a brilliant deep orange blotch, delicately fragrant...per doz. 21/- 2 0

FRITILLARIA imperialis—the Crown Imperial.

The Crown Imperial is a stately hardy border-plant, very effective in Spring when grouped in woodlands, wild gardens, orchards, etc. Its tall, stout, leafy stem terminates in a cluster of large drooping bell-shaped flowers, surmounted by a whorl of fresh green leaves. For forming bold groups in the permanent border or on lawns it is of great value, and should be allowed to remain undisturbed. To obtain the best success, *plant the bulbs in September*, in a good deep loam, the top 4 to 5 inches below the surface, and by preference on their sides, to prevent moisture accumulating in the centre. *We offer specially strong selected bulbs, superior to what are usually sold*, and which we hope will all bloom the first season. The Crown Imperial, however, is a plant which requires to become established a year in the ground to be at its best.

FRITILLARIA IMPERIALIS (Crown Imperial)—*continued.*

each—s d

FRITILLARIA IMPERIALIS (CROWN IMPERIAL).

beauty may be obtained by associating SNOWDROPS with SCILLAS SIBIRICA and BIFOLIA, CHIONODOXAS, WINTER ACONITES, etc. Where possible such plantings should be permanent, and the surface of the soil top-dressed in Summer and sown with annuals, such as Nemophila, Leptosiphon, etc., or planted with surface-rooting bedding plants.

The SNOWDROP looks charming when nestling in grass, on hedge banks, etc. The turf need not be disturbed if *Barr's Bulb Planter* be used (*see page 95*); this cuts out clean holes large enough to take two or three bulbs.

Permanent plantings of Snowdrops should be made as far as possible in shady situations.

On light soils Snowdrops should be planted **6 to 9 inches deep**, the stronger-growing bulbs being planted the deepest.

		s.	d.	s.	d.	s.	d.

GESNERAS. See our *Spring Catalogue of Bulbs and Tubers*.

× GLADIOLUS.

BARR'S SUMMER-FLOWERING VARIETIES.

For Autumn and Winter Planting.

These beautiful **Early-flowering Gladioli** should be largely planted for supplying cut bloom from May to July ; and for the fine effect they produce in the flower garden. **G. Colvillei** The Bride is extensively grown in pots and boxes for cutting during April, May, and June. All may be grown in pots for indoor decoration.

CULTURE OUTDOORS.—Select a situation protected from cutting winds and shaded from the mid-day sun. Deeply dig the ground, working in plenty of rotten manure in the underspit, and see that the soil is made light and friable. Plant the bulbs from October to November by preference, although they may be put in as late as January. They should be put in at a depth of five to six inches, and in the case of the later plantings the bulbs should be soaked in water a few hours previously. Before severe frost comes on cover with a little long straw litter or other light material, which

GLADIOLUS—*continued.*

remove in March. If the Summer is dry and the weather hot, give an occasional good soaking of water or weak liquid manure. A mulching of well-decayed manure in early summer will considerably benefit the plants.

CULTURE FOR CONSERVATORY DECORATION.—Plant three to five bulbs, according to size, in a 5- or 6-inch pot, and plunge in ashes up to the rim of the pot in a cold frame or pit, withholding water till the bulbs have started into growth; or, the pots may be buried up to the rim in ashes out of doors under a south wall, a light covering of such material as dried heather being given as a protection against severe frost. When the plants are well advanced in growth they may be removed to the conservatory or greenhouse.

× **EARLY SUMMER-FLOWERING HARDY GLADIOLI.**

These commence to bloom out of doors the beginning of June or by gentle forcing may be had in flower in April and May.

× GLADIOLUS, NEW HYBRID BUTTERFLY.
(*Gladiolus Lemoinei.*)

These beautiful hybrids originated by crossing the best forms of **Gladiolus Gandavensis** with **Gladiolus purpureo-auratus**, and have been since improved by hybridising. They are without doubt the most beautiful of all Gladioli, and should have a place in every flower border; the flowers are of the most delicate and brilliant shades, and are all handsomely blotched with fine contrasting colours, reminding one of the beautiful Butterfly Tulips (*Calochorti*). They are hardy vigorous growers, and if planted early in April bloom from the middle of July to the middle of August. A descriptive list will be found in our *Spring Catalogue of Bulbs and Tubers*.

GLADIOLUS, NEW HYBRID BUTTERFLY—*continued.*

< GLADIOLUS BRENCHELEYENSIS.

The Large-flowered Vermilion-Scarlet Gladiolus.

This well-known handsome Gladiolus blooms just before the *Gladiolus Gandavensis* varieties, and is one of the most valuable for bedding. By successional plantings outdoors from end of March to May, a brilliant display of bloom may be had from middle of July to late autumn. A fine effect may be produced by massing this Gladiolus with *Galtonia candicans*, the snowy white spikes of which top the Scarlet Gladioli; both bloom about the same time.

BARR'S CHOICE NAMED HYACINTHS.

For Glasses, Jardinets, Bowls, Pots, and for Exhibition.

Culture in Pots.—The soil should be a compost of good fibrous loam with a liberal addition of leaf-soil, sharp sand, and thoroughly well-decayed cow manure. PHYTOBROMA (*see page 96*) may also be added at the rate of 1 lb. per bushel. The compost should be well mixed and left to stand some time before being used. New pots should be well soaked in water before use.

In potting, barely cover the bulb, and let the soil be ¾ in. below the rim of the pot, to allow for watering. After potting give one good watering and then place the pots outdoors on a bed of ashes, cover with six inches of cocoa fibre, and leave them exposed to all weathers. When the bulbs have well rooted, and made about an inch of top growth, they may be removed indoors, first into a subdued light, until the blanched foliage has attained its full green colour, and then into the sunniest situation at command in the greenhouse or conservatory. It is a good plan to place an inverted flower pot over the young growths for a few days after being removed from the plunging bed, as by so doing they are protected from possible draught. Abundance of air, a moderately moist atmosphere, and plenty of water at the roots are then necessary for early well-developed flower-spikes. A dry or frosty atmosphere or a draughty situation will cause the flower-buds to shrivel. Forcing should only be done gently, the temperature not exceeding 60 degrees. A too frequent fault made in forcing Hyacinths is that they are subjected to heat before the bulbs are fully rooted.

For earliest flowers—namely, for January and February—pot middle of September and leave in the plunging bed 10 to 12 weeks.

☞ If finely developed trusses and rich colours are preferred to very early flowers, the Hyacinth should not be forced; pot up the bulbs middle of October and leave them plunged out of doors three months or more, according to season, then remove them to a mild temperature like that of a cool greenhouse, a sitting-room window, or frame, always selecting the sunniest and most genial situation.

Culture in Glasses.—We recommend only Single Hyacinths for glasses. The most reliable sorts for growing in glasses we have indicated by Ψ. Pure clean water (rain-water by preference) the same temperature as the room should be used, with a piece or two of pure wood charcoal in it. The bulb can be made secure in the glass by a piece of fish netting, and its base should at all times just touch the water. Place the glasses in a cool dark place to encourage root growth, and keep supplied with water as required. When nearly full of roots (not before), and an inch or two of top growth has been made, admit them to the light gradually, and then to the sunniest place at command where there is full light and an even airy temperature. Avoid a too dry or frosty atmosphere or a draughty situation, as such conditions will often cause the flower-buds to shrivel up. A little rain-water gently sprinkled daily on the green flower-spikes will assist in their development. Barr's Fertilised Fibre, Shell and Charcoal Mixture is an excellent material for growing Hyacinths in, and is clean and inoffensive to handle (*see page 3 for directions*).

Culture in Jardinets.—For this purpose Barr's Fertilised Fibre, Shell and Charcoal Mixture is undoubtedly the best material to use. It should be always kept moist, and when the jardinet is removed to the sitting-room the surface should be covered with fresh green carpet moss or mossy Saxifrage. Grown in jardinets, Hyacinths are charming when associated with early Spring-flowering bulbs like *Chionodoxas*, *Scilla sibirica*, Snowdrops, Tulips, Crocuses, Narcissi, *Iris reticulata*, etc.

Hanging Moss Balls of Hyacinths.—Very charming hanging baskets of Hyacinths can be made with balls of fresh Sphagnum moss, 9 inches in diameter. First make up a ball of moss about 8 inches in diameter, into which insert the Hyacinth bulbs all round, binding them in with tarred string and more moss so that only their points are visible. Then run a wire through by which the ball can be suspended in greenhouse or sitting-room window. No more attention will be required except to dip the ball in water about once a fortnight. Such hanging baskets can be effectively made with Named or Bedding Hyacinths, and also with Roman Hyacinths. The open wirework baskets which are sold can be filled in the same way.

BARR'S "PRIZE-WINNING" EXHIBITION HYACINTHS.

HYACINTH LA BELLE GROWING IN BOWL.

A very careful selection of a few of the finest Hyacinths for Exhibitors.

We have selected these varieties out of many hundreds, as being specially suitable for exhibition on account of their grand spikes of fine form, their large bells and beautiful colours. Several of them are new varieties, and a great advancement on existing kinds. Most of them have been awarded prizes and certificates of merit. All are single-flowered varieties except where otherwise stated.

Ψ indicates those sorts which should be selected where the bulbs are required for growing in glasses.

BARR'S SELECTED BEDDING HYACINTHS.**For Bedding, Boxes, Bowls, or Pot-Culture.**

The following Hyacinths we have specially selected after many careful trials at our Nurseries as being the **very best for bedding together or alone**. They all have good-sized, well-formed spikes of distinct pure colours. We also recommend them for filling flower boxes, rustic baskets and vases, etc., and for making into hanging baskets: (see page 37).

BARR'S "RAINBOW" MIXTURE OF HYACINTHS.**For Filling Beds and Planting in Borders, etc.**

Barr's Beautiful "Rainbow" Mixture of Hyacinths. These are grown specially for us on one of the large Hyacinth Farms in Holland, and are unsurpassed for quality. The colours are judiciously blended, including *red, scarlet, purple, lavender, porcelain, azure-blue, white, rose, blush, etc.*, producing a magnificent effect in flower beds and borders. Purchasers cannot fail to be pleased with them.

Extra selected bulbs, per 100, 16/6; per doz. 2/8

MINIATURE HYACINTHS for Children's Gardens, etc.

In *children's gardens* and small flower-beds, or as front edgings and ribbons, these **Miniature Hyacinths**, alone or intermingled with other dwarf Spring-flowering bulbs, make a fine display throughout the Spring months. They are also valuable for growing in small glasses, fancy pots, china bowls, crystal dishes, jardinetts, etc., alone or associated with *Scilla sibirica*, *Chionodoxas*, *Crocuses*, *Snowdrops*, *Dwarf Tulips* and *Daffodils*, *Iris reticulata*, etc. For cultural directions, see page 3.

Annuals for Autumn Sowing.

List of Hardy Annuals suitable for September sowing in the open for early Spring display, sent on application.

BARR'S EARLY WHITE ROMAN HYACINTHS
GROWN IN A BOWL.

EARLY WHITE ROMAN HYACINTH.

Extra Selected French-grown Bulbs.

This charming little Hyacinth is of great value for early forcing, and may be had in bloom during November, December, and January by successional plantings. Several bulbs in a pot make a charming Winter decoration for the greenhouse or sitting-room, while to cut for bouquets and vases the graceful spikes of sweet-scented blooms are highly prized. The Roman and Italian Hyacinths lend themselves readily to culture in bowls of pebbles and water or our fertilised fibre, shell and charcoal mixture. (*For Cultural Directions, see page 3.*)

Second-size bulbs we do not stock, as they produce fewer flower spikes than the above; we can procure them for customers, however, if required.

Barr's "Extra Early"

SMALL PINK HYACINTH, from Asia Minor.

A very graceful little Hyacinth and quite the earliest to bloom, coming in even before the Early White Roman Hyacinth per 100, 30/- ; per doz. 4/-

Barr's "Extra Early"

BLUSH ITALIAN HYACINTH.

A very beautiful variety with fine spikes of delicate blush-white flowers opening before the other Italian Hyacinths per 100, 30/- ; per doz. 4/3

ITALIAN AND FRENCH EARLY HYACINTHS.

These bloom just after the White Roman Hyacinth, and are therefore valuable for succession. They are all of graceful beauty, and may be had in bloom in December and January. They can easily be grown in bowls of pebbles and water or our prepared Fibre, shell, and charcoal mixture, and make a very pretty decoration for the greenhouse and sitting-room.

Blue, producing spikes of dark porcelain-blue flowers on dark-coloured stems per 100, 14/6 2 0

Ivory White, producing elegant spikes of white bells with tube delicately tinged creamy blush, valuable for cutting and succeeding the *White Roman Hyacinth* per 100, 14/6 2 0

Parisian Double Blue, flowers double, full lavender, the tube shading to a pretty azure-blue per 100, 21/- 3 0

Primrose, a lovely Hyacinth producing freely graceful spikes of pale chrome-yellow single flowers ; very beautiful when grown in bowls and vases per 100, 35/- 5 0

Shell-Pink, bearing semi-double bells of elegant form, colour a charming shell-pink shaded blush-white, very beautiful. This variety will only bear very gentle forcing per 100, 21/- 3 0

HYACINTH—Grape, Starch, and Feathered. See *Muscari*, pages 62 and 63.

each—s. *d*

Delavayi, a lovely Chinese plant, having umbels of large rose-coloured Gloxinia-shaped flowers and a graceful prostrate foliage, ht. 2 ft. ; it is quite hardy, but delights in a deep sandy well-drained soil and sunny situation ; excellent for the flower border, rock garden, or for pots.

Strong Flowering Roots, per 100, 55/- ; per doz. 7/6

grandiflora, a later introduction from China, bearing large deep rose-coloured flowers with golden throat, ht. 1 ft. It likes a dry sunny situation per doz. 15/-

IRISES.

These may be called the "**Orchids**" of the flower garden, their blossoms competing in richness and variety of colour with the choicest and the most beautiful Orchids. They should be extensively planted in flower and shrubbery borders, and naturalised ; a judicious selection will give a display of bloom from Christmas to August. See our *Hardy Plant Catalogue* for all kinds of Flag Irises.

BARR'S ENGLISH IRISES.—June to July-flowering.

The Finest Collection Existing.

These magnificent English Irises (*I. xiphioides*) thrive in any ordinary garden soil. *The earlier the planting, after beginning of September, the greater the success*, although the bulbs may be put in as late as December. The varieties contained in our collection we have specially selected as being the finest and most distinct, and they will be found as *strikingly beautiful in colour as*.

the most sumptuous Orchids of the hothouse. They flower from end of June to beginning of July, thus succeeding the **Bearded Flag Irises** and **Spanish Irises**. As cut flowers they take a first place.

BARR'S SPANISH IRIS—June-flowering.

The Finest Collection Existing.

These Spanish Irises (*Iris Xiphium*) flower a fortnight before the English, and differ from them considerably in colour and form. The curious and charming blendings of shades in the same flower give them the appearance of many of our rare orchids, with which they can well compete in grace and beauty. For vases and bouquets the cut flowers are greatly prized, as they last long when cut, and the buds open well in water. For filling flower-beds and massing in borders these elegant Irises are of the greatest value. The varieties forming our collection are the finest and most distinct in cultivation. They are easily grown in any good light soil either in an open or partially shaded situation. They will also bear very gentle forcing in pots, but this should not be attempted until the flower buds are developing.

NEW GIANT EARLY XIPHIMUM IRISES.

This new race of Irises was raised by Mr. C. G. Van Tubergen, by crossing *Iris tingitana*, *Iris Boissieri*, and other Xiphium Irises, and during the last ten years they have been carefully selected and improved upon. They differ from the Spanish Irises in flowering a fortnight earlier (commencing to bloom about end of May), and having larger flowers of greater substance, while the foliage is very broad and glaucous. They will be found valuable in giving a decoration in the garden in the period intervening between the late Cottage Tulips and the Spanish Irises. Their colours are bright and attractive. In very cold districts they should be given slight protection from frost during winter.

Barr's Selections—3 each of 7 beautiful named varieties 22/6
 1 " 7 " " " " " 8/-

VARIOUS BEAUTIFUL

BULBOUS AND TUBEROUS-ROOTED IRISES.

THESE IRIS SPECIES are all hardy and beautiful, flowering one after the other from November to June. The dwarf early species will be more enjoyed if planted on rockwork, where the flowers have a little protection from heavy rains. *Alata*, *Reticulata* var. *Histrio* and *Histrioides*, and *Vartani* are charming Winter-flowering species, followed in February by *I. reticulata*, with its lovely violet-scented blossoms, the sweet-scented *I. persica*, *Bakeriana*, *Danfordia*, and the beautiful species *I. rosenbachiana* and *Sindpers*. Next in succession come the interesting *Bucharica*, *Caucasica*, *Orchioides*, *Warleyensis*, *Willmottiana*, the curious Snakeshead *Iris tuberosa*, and the species *I. sindjarensis*. The pretty Peacock Iris (*I. pavonia*) and *Iris flavissima* flower in May, and are followed in June by *Irises juncea*, *Boissieri*, *lusitanica*, and *tingitana*.

The Irises marked † belong to the *Juno* section, and thrive best planted in rich light or sandy soil with a light dressing of old manure. As they are mostly winter and early spring-flowering species give them a position protected from the early morning sun.

Barr's Hardy Plant Catalogue

fully describes the best Perennials, Alpines, Rock Plants, Climbers and Hardy Aquatics, with many useful notes on culture. *Post Free*.

IRIS RETICULATA HISTRIOIDES.

Reticulata var. Histrio, a charming variety from Palestine, flowers bright blue, blotched golden-yellow, earlier than *I. reticulata*, ht. $\frac{1}{2}$ ft.

Extra selected bulbs, per doz. 5/6 o 6

„ **var. Histrioides**, a beautiful Iris, flowers varying from purple-blue to bright blue with white spots on falls and a narrow orange crest; it is larger than *I. reticulata* and blooms earlier, ht. $\frac{3}{4}$ ft. FIRST-CLASS CERT. R.H.S. Extra selected bulbs, per doz. 5/6 o 6

„ **Krelagei**, claret-purple, blotched golden-yellow, violet-scented, ht. $\frac{3}{4}$ ft. per doz. 3/9 o 4

† **Rosenbachiana**, beautiful sweet-scented flowers, generally white and rosy violet, but variable, ht. $\frac{1}{2}$ ft. FIRST-CLASS CERTIFICATE R.H.S. 5 6

† **Sindjarensis**, a charming species from Mesopotamia, resembling *I. caucasica* in growth; but flowers white and azure-blue, prettily crested, March-flowering, ht. 1 ft., charming in pots Strong bulbs, per doz. 5/6 o 6

† **Sindpers**, a handsome hybrid of *Iris Sindjarensis* × *persica*, producing in February large flowers with silvery grey standards, and falls beautifully marked black, with gold crest, a valuable variety for pots 3 6

Sisyrinchium, an interesting May-flowering species, with small soft lavender flowers, the falls blotched white, ht. $\frac{1}{2}$ ft. Requires a warm sunny situation...per 100, 5/6; per doz. 10d. —

Stylosa. See *Ungicularis*, page 92.

† **Tauri**, flowers large and beautiful, in form resembling *Heldreichii*, standards violet-purple, falls a dark velvety purple with white markings, and having a yellow-tipped erect, ht. 4 in. A few vary to a pretty lavender shade with purple markings. AWARD OF MERIT R.H.S. per doz. 7/6 o 8

Tingitana, a lovely bulbous Iris from Tangiers, thriving in a warm sunny situation, and delighting in a sandy gritty soil containing lime rubbish. It should be kept dry by means of a handlight from July to October and be protected from heavy rains in winter. The flowers vary in the standards from dark to light blue, falls lilac and white with golden blotch, May- to June-flowering, ht. 2 ft..... Strong selected bulbs, per 100, 30/-; per doz. 4/3 o 5

Tuberosa (Snakeshead Iris), flowers rich velvety violet-black and green, remarkably curious and handsome, quite hardy, ht. $\frac{3}{4}$ ft. per 100, 5/6; per doz. 10d. —

Ungicularis. See page 92.

Vartani, a pretty little species found near Nazareth, producing flowers in November or December, deep azure-blue with darker veinings, ht. $\frac{1}{2}$ ft. per doz. 3/6 o 4

„ **cœrulea** (new), flowers a beautiful pale blue with porcelain-blue and white markings, winter-flowering, ht. $\frac{1}{2}$ ft. per doz. 6/6 o 7

† **Warleyensis**, an elegant species with flowers in the way of *Iris orchoides*, standards deep lilac-blue, and falls purple-violet, prettily marked white and yellow per doz. 15/- 1 6

† **Willmottiana**, a pretty new species from Turkestan in the way of *Iris caucasica*; standards azure-blue, falls white margined sky-blue and blotched violet 4 6

Xiphioides. See *English Irises*, page 43. **Xiphium**. See *Spanish Irises*, page 44.

Xiphium præcox (erroneously called *Filifolia*), a pretty Spanish species, flowers purple-blue with yellow spot, ht. 2 ft.; slight protection should be given during winter per 100, 17/6; per doz. 2/3 o 3

☞ Any other bulbous Irises in commerce not mentioned in the above list can be supplied.

CUSHION IRISES.

(Oncocyclus and Regelia Irises.)

These Irises, most of which are natives of Palestine, form a distinct class by themselves, and are remarkable for their great beauty. The dormant roots may be planted outdoors or potted up from November to February. If planted outdoors a warm sunny situation is recommended, and by preference a raised bed; the tops should be not more than $1\frac{1}{2}$ inches below the surface, and the soil a light and loamy one thoroughly well-drained, into which plenty of bonemeal and mortar rubbish has been worked; give a light covering with dry heather until danger of severe frost is past, when the covering should be removed. Immediately the plants have done flowering place over them a hand light, or panes of glass elevated eighteen inches above the ground, so as to admit at the sides a free entry of air, and at the same time to keep off rain till November; the object desired is to thoroughly ripen the roots, and prevent their starting into growth too early. Just as Winter sets in cover with three or four inches of dry

CUSHION IRIS—*continued*.

heather or other light material in order to keep off heavy rains. The *Oncocyclus* Irises like to remain undisturbed for years. The great beauty of these Irises, especially when seen in established masses, will fully repay the little extra trouble in growing them. They are charming subjects for pots and take readily to a cold-frame treatment; artificial heat they object to.

(Coloured Plate of the *Oncocyclus* Irises, *Gatesii*, *Lorteti*, and *Lupina*, price 6d. Coloured Plate of Irises *Atrofusca*, *Bismarckiana*, *Atropurpurea*, and *Helenæ*, price 6d.)

☞ S. is used to signify **Standards**, or the erect petals; F. **Falls**, or the drooping petals.

	each—s.	d
Atrofusca , a handsome Iris, S. claret-brown, veined black, F. brown-black, ht. 3 ft.	per doz. 7/6	o 8

Vaga , a curious and beautiful Cushion Iris, flowers lavender and bronzy brown.....	1	0

NEW HYBRID CUSHION IRISES.

(*Regelia* × *Oncocyclus* Hybrids.)

A lovely new race of Irises, being the result of crosses between the *Regelia* and *Oncocyclus* species. They caused a great sensation at the Royal Horticultural Society's Show, May 17th, 1904, when first shown, several being awarded certificates. These Irises have proven to be of fairly easy culture, and we can strongly recommend them to Iris lovers. They should be given a rich loamy soil mixed with sand and mortar rubbish. About the middle of July the roots should be lifted and kept dry until October, when they should again be planted.

BARR'S FLAG IRISES.

Tall Bearded, Dwarf Bearded, and Japanese, etc.

These beautiful Irises form a great feature in our cultures. They supply a floral decoration from March to July. Plant in Autumn—for full descriptive list, see our HARDY PLANT CATALOGUE.

IXIA.—The African Corn Lily.

A most graceful plant, bearing on wiry stems 15 to 21 inches high long loose racemes of bloom of remarkably rich and varied colours. All have a brilliant dark centre, and in the sun's rays present a picture of *gorgeous beauty*.

CULTURE IN POTS.—From October to January plant five or six bulbs in a four- or five-inch pot, using a compost of turfy loam, leaf soil, and silver sand. Make the soil firm about the bulbs, and plunge the pots, up to the rim only, in ashes in a cold pit or frame, or under a south wall. Until a little top growth has been made no water should be given, and then only sparingly at first. When the plants are in growth, the lights should be left off except during wet or frosty weather. Early in February, or when sufficient growth has been made, remove the plants to the greenhouse, keep close to the glass, and carefully attend to the watering.

CULTURE OUTDOORS.—Plant from November to January, at a depth of three inches, and the bulbs two inches apart, on raised beds, in a prepared light loamy soil, in a sunny situation, protected if possible from cold east and northerly winds. When planting cover the bulbs with coarse sand. A covering of straw, litter, heather, or other light material will protect the early top growth from frosty winds, but it should be removed in March.

„ „ *extra large bulbs* „ 12/6 i 9

For **Campanelle Jonquil** and **Queen Anne's Double Jonquil**, see *Narcissus Odorus* varieties, pages 32 and 35 of *Daffodil Catalogue*.

LACHENALIA, very beautiful greenhouse plants flowering in early Spring, with curiously spotted leaves and handsome flower-spikes. They should be potted in August and September in a compost of loam, sweet leaf soil, and sand, the bulbs being placed $2\frac{1}{2}$ to 3 inches below the surface and surrounded by sand; place the pots in an airy greenhouse or cold frame close to the glass, and give very little water until the bulbs have made foliage. In early November, before cold weather sets in, the pots in the cold frame should be transferred to a sunny situation in greenhouse where the temperature does not fall below 45° . The Lachenalia likes abundance of sunshine but not overmuch heat. In May, remove the pots again to a cold frame fully exposed to sun, and gradually cease giving water so that the bulbs may ripen off. A very beautiful effect is obtained by planting Lachenalias in wire hanging baskets for greenhouse decoration.

	each—s. d
Ada Bryson (<i>new</i>), a deep old golden colour, suffused with bronze and orange, good spikes, very free and strong grower, <i>extra fine</i> , ht. 10 in. per doz. 5/6 o 6

LAPEYROUSIA cruenta. See *Anomatheca cruenta*.

LEUCOJUM ÆSTIVUM.

LEUCOJUM (Snowflake).

(Spring, Summer, & Autumn-Flowering.)

Leucojum vernum, the **Spring Snowflake**, is one of the earliest and most beautiful Spring flowers, handsome in outline and of elegant drooping habit. *L. æstivum* and *Hernandezii*, the **Summer Snowflakes**, flower in April and May, and their elegant blossoms are prized for bouquets. These Spring and Summer Snowflakes delight in shady situations. *L. autumnale* and *trichophyllum* are charming dainty little species.

autumnale (Acis), white and pink flowers in Autumn, graceful in pots and on rockwork, etc., ht. 4 in.; grow in pure sand in shade; quite hardy

each

s. d

per 100, 7/6; per doz. 1/3 o 2

trichophyllum (Acis), pure white, a rare and very beautiful Spring-flowering species; grow in moist sand, give cold frame or cool greenhouse treatment, per doz. 3/6 o 4

æstivum (Summer Snowflake), a handsome plant, bearing spikes of elegant drooping white flowers in May, which are greatly prized for cutting, ht. 1½ ft.

per 1000, 45/-; per 100, 5/-; per doz. 9/-

„ „ Smaller bulbs, for naturalisation

per 1000, 30/-; per 100, 3/6

Hernandezii (*syn. pulchellum*), elegant drooping white flowers in May, ht. 1½ ft....per 100, 8/6; per doz. 1/3 o 2

vernum (Spring Snowflake), a favourite little early spring flower with drooping bell-shaped flowers, white with small green or yellow tip, ht. 4 to 6 in.....per 100, 5/6; per doz. 10d.

vernum carpathicum (*syn. Wagneri*), a robust-growing variety of the Spring Snowflake, with larger flowers, white prettily tipped canary-yellow or green; valuable for edgings, masses at foot of rockwork, and for naturalising in grass, etc.

per 1000, 60/-; per 100, 6/6; per doz. 1/-

BARR'S BEAUTIFUL LILIES,

For Naturalising in Flower and Shrubbery Borders, and for Greenhouse Decoration.

For chasteness and beauty of colour and form, the **Lily** stands pre-eminent amongst hardy plants, and by a judicious selection of species a continuous display of bloom can be maintained in the flower garden or greenhouse from May to October. In the flower or shrubbery border they are most effective when planted in bold groups, while isolated clumps on lawns of the taller-growing Lilies produce a fine effect. The flowers are greatly prized for cutting, as they mix well with other plants and remain fresh in water a long time.

General Hints on Culture.

Lilies planted out-doors.—The conditions essential to success in growing Lilies may be generally summarised thus :—**A cool rooting medium; Perfect drainage; and Shade from hot sun.**

These conditions can be readily fulfilled in the borders of Rhododendron and Azalea beds, or amongst the various subjects grown in the herbaceous and shrubbery border. In such positions the young Spring growths are protected from cold winds, and the ground is kept shaded and cool by the shade of the surrounding plants. This is especially needed in the case of those Lilies which make *stem roots*, as these are only developed freely in shade. On these roots, which are produced at the base of the stem, the flower-head largely depends for its successful development, and the bulb for its preservation. As soon as they appear a light covering of good rich soil should be given, into which they can root freely. **The chief stem-rooting Lilies in the following list are marked thus δ.** There are others which are less dependent on these stem roots, which they only produce when the bulbs are planted on rich soil and in shade.

In preparing the ground for Lilies loosen the soil to a depth of 2 feet or more, and add or fill in the necessary compost (*see notes below*). Plant the bulbs 2 to 3 inches deep, surrounding and covering them with sand, and then top-dress with a compost of light soil and well-decayed manure, working in pieces of burnt or charred wood. As growth advances a mulching of light rich soil should be occasionally given, and during the growing period the plants should be freely watered. In late autumn cut down the old flower-stems and give a light covering of leaves or cocoa fibre.

LILIES—CULTURAL NOTES—*continued.*

LILIUM AURATUM.

given twice a week when the flower-buds are well advanced will greatly assist in the development of fine blooms. A north wall or hedge is a suitable situation for starting the bulbs. If very early flowers are required the plants may be transferred from the cold frame into a gentle heat, but must be kept as near the glass as possible to prevent their getting drawn. Shade should be given to the lower portion of the stems to induce free stem-roots, and these should be top dressed as they appear. Give air freely, and fumigate if required. When coming into bloom a little weak manure-water will be of great assistance to the plants.

To those desiring further information regarding Lilies, we commend the following books: Dr. Wallace's "Notes on Lilies" (5/6 *post-free*), Miss Jekyll's "Lilies for English Gardens" (8/10 *post-free*), "The Book of the Lily" (by William Goldring), 2/9 *post-free*; also Vol. XXVI. of the Royal Horticultural Society's Journal containing a report of the Great Lily Conference at Chiswick, July 16, 1901.

☛ The majority of Lilies are not ready for dispatch before the beginning of November; a few sorts, however, are ready earlier, such as Candidum, Croceum, longiflorum, etc., while some of the Japanese imported varieties do not arrive until December. Orders for Lilies will therefore be executed, if necessary, in two or more parts.

Soils and Situations Recommended for Different Lilies.

|| Indicates those Lilies of easiest culture, being strong free growers thriving in most soils. Where soil is very dry and poor, add loam and peat, or leaf soil; where heavy and damp, add sand and leaf soil. All require good drainage and plenty of moisture while in growth.

Ω Indicates those Lilies requiring a good friable soil, not too dry, and the addition of a little peat is advisable. The lower part of the stems should be kept in shade.

⌈ Indicates those Lilies delighting in shady and moist situations, sheltered from strong winds. A well-drained peat soil, where there is bottom moisture for the bulbs to root into, is recommended. Where a brook, stream, or pond is available, they may be planted at the margins, where the bulbs can remain moderately damp, and the roots find all the moisture they require below. In planting cover and surround bulbs with sand.

δ Indicates the chief *stem-rooting* Lilies (see CULTURAL NOTES).

BARR'S SELECTIONS OF BEAUTIFUL LILIES.

For Greenhouse decoration,	25 in 25 beautiful named vars.,		£1 1s., £1 10s., & £2 2s.
" " "	12 in 12 " " "		12s., 18s., £1 5s. to £2 2s.

LILIES—continued.

N.B.—For the interest of buyers we have added, after the name, the plant's native country.

- Ωδ **Auratum** (The White Golden-rayed Crims on-spotted Hill Lily of Japan), ht. 4 to 6 ft. This is indeed the **Queen of Lilies**, and should have a place in every garden and greenhouse. It commences to bloom in August and continues on into September. It is of simplest culture and perfectly hardy. Those who have beds or borders of Rhododendrons should plant this grand Lily freely amongst them for a succession of bloom. Growing amongst Pæonies, and along the margins of evergreens, groups of **L. auratum** (6 to 12 bulbs in a clump, planted 9 inches apart), produce a grand effect. As isolated subjects on large lawns, groups of **Lilium auratum** look very handsome and stately. A situation should be chosen where the plants are sheltered from cutting winds and screened from the midday sun; on slopes, in a free soil, moist but not wet, this Lily does well, and makes a fine effect.

We are expecting our first consignment of this beautiful Lily to arrive early in December from Japan, and we are booking orders for delivery immediately on arrival, at the following prices. The larger-sized bulbs produce the most flowers.

Ωδ Auratum	Extra Large Bulbs, each 1/6; per doz. 15/-; per 100, 105/-	
„	Splendid Large Bulbs, each 1/-; per doz. 10/6; per 100, 75/-	
„	Good-sized Bulbs, each 9d.; per doz. 7/6; per 100, 55/-	
„	Smaller Bulbs, each 6d.; per doz. 5/6; per 100, 40/-	
„	A few Special Monster Bulbs, each 2/6 & 3/6.	
„	pictum , large white flowers, beautifully spotted crimson, and petals tipped red, very showy, ht. 4 ft.	each s. d. per doz. 17/6 1 8
„	platyphyllum , very large handsome flowers of great substance, with broad white petals, spotted crimson, bold handsome foliage, and sturdy habit, ht. 5 to 10 ft.	Strong bulbs, per doz. 15/- 1 6
„	„ Extra strong bulbs „ 25/-	2 3
„	rubro-vittatum , large pure white flowers, with a broad deep crimson band down the centre of each petal; a Lily of great beauty and the admiration of all who see it, ht. 3 to 4 ft.	Strong bulbs, per doz. 21/- 2 0
„	„ Extra strong bulbs „ 27/6	2 6
„	virginale , large handsome flowers of great substance, pure white faintly spotted yellow, with yellow band down centre of each petal, ht. 4 to 5 ft.	per doz. 25/- 2 3
„	„ Extra strong bulbs „ 36/-	3 6
„	Wittei , large pure white unspotted flowers, with golden band running down centre of each petal, chaste and beautiful, ht. 3 to 4 ft.	Extra strong bulbs, per doz. 36/- 3 6
δ Batemani (Japan), a beautiful Lily with rich glowing apricot-red flowers in August and September, ht. 3 ft.	per doz. 8/6	0 9

LILIUM BROWNII.

- Ωδ **Brownii** (China and Japan), a very beautiful Lily, producing, in July, handsome trumpet-shaped flowers nearly 10 inches long, tips of petals reflexing slightly, pure white inside, with brown anthers, outside chocolate-brown, ht. 3 ft.; valuable for borders or pots, and of easy culture. (See illustration) per doz. 24/- 2 3
- Extra strong bulbs „ 36/- 3 6
- Ωδ **Brownii var. odorum** (syn. japonicum colchesterense) (Central China), a rare Lily bearing handsome fragrant flowers in July, chrome-yellow changing to creamy white and streaked outside very dark chocolate-brown, ht. 3 ft. FIRST-CLASS CERTIFICATE R.H.S. 1/6 & 2 6
- ||δ **Bulbiferum true** (Central Europe and South-Eastern Scandinavia), bearing in June umbels of erect cup-shaped flowers of perfect form with broad fleshy petals, brilliant scarlet with centre orange finely speckled crimson, ht. 1½ ft. This species has the characteristic of producing bulbils in the axils of the leaves per doz. 9/- 0 10
- ¶ **Canadense** (N.-E. America), a very graceful Lily, producing in July pendent bell-shaped flowers ranging from yellow to orange, heavily spotted crimson-black, ht. 3 ft. per doz. 9/- 0 10

LILIES—continued.

each—s. d.

- Canadense flavum**, soft yellow, heavily spotted crimson-black, ht. 3 ft. per doz. 12/6 1 3
 „ **rubrum**, red, inside orange spotted black, ht. 3 ft. „ 12/6 1 3
- || **Candidum**—The Snow-White Madonna Lily or COTTAGER'S WHITE GARDEN LILY (*South Europe, etc.*). This Lily likes a good deep soil, not too dry, and should be left undisturbed for years. *Bulbs supplied from September to December only.* Before planting dust the bulbs with dry flour of sulphur, and this will aid in keeping away disease. Plant shallow with the tops just below the surface, and then give a mulching of well-decayed stable manure. The variety we supply is the fine **broad-petalled type**.
Extra strong healthy bulbs, per 100, 25/-; per doz. 3/6 0 4
 „ „ „ *Strong healthy bulbs* „ 21/-; „ 2/9 0 3
 „ „ „ *Smaller bulbs for naturalising* „ 16/6; „ 2/4 —
For prices of a few monster bulbs see page 8.
- ¶ **Carniolicum** (*Lombardy, Dalmatia, etc.*), a pretty June-flowering Austrian species bearing nodding vermilion-coloured flowers with reflexed petals, ht. 3 ft. per doz. 18/6 1 9
- || **Chalcedonicum**—The Scarlet Turk's Cap Lily of COTTAGE GARDENS (*Greece, etc.*), flowers intense deep scarlet, blooming in *July*, very showy and effective, ht. 3 ft. per doz. 10/6 1 0
 „ „ „ *Extra large bulbs* „ 15/- 1 6
- || „ **Heldreichi**, a remarkably handsome form with large flowers of great substance, brilliant scarlet, ht. 2½ ft. per doz. 30/- 2 9
- Colchicum**. See *Monadelphum*.
- Ω **Columbianum** (*N.-W. America*), the **Oregon Lily**, a very graceful species, bearing from July to August several small fragrant flowers of a brilliant deep orange, spotted crimson, resembling a miniature *Humboldtii*, ht. 3 ft.*Extra strong bulbs*, per doz. 15/- 1 6
- δ **Concolor** (*China and Japan*), a very lovely little Lily, bearing in July two to three erect glossy fiery scarlet flowers with dark red spots, ht. 1 ft. **FIRST-CLASS CERTIFICATE R.H.S.** A gem for sheltered sunny nooks on rockwork where it can be kept fairly moist during dry weather; it makes also a charming pot-plant for the greenhouse per doz. 7/6 0 8
- δ **Coridion** (*China and Japan*), beautiful lemon-yellow flowers, spotted purple; a very elegant little Lily, ht. 2 to 3 ft., July-flowering.....per doz. 8/6 0 9
- || **Croceum**—The Cottager's Orange Lily (*South Europe*), flowers very showy, fiery orange shaded red in centre and minutely spotted dark crimson, produced in June; when well grown and established it attains a height of 5 to 7 ft., with a large quantity of flowers on each stem. This Lily is now getting scarce per 100, 40/-; per doz. 5/6 0 6
A few very large bulbs „ 7/6 0 8
- „ **Davuricum**. See *Umbellatum*.
- || **Elegans** (*syn. Thunbergianum*) (*Japan*), a very beautiful group of showy Japanese Lilies, mostly *June- and July-flowering*, greatly valued for flower border and pot-culture. These are best planted in Autumn.
- „ **“Alice Wilson,”** now almost out of cultivation; we recommend in lieu **Orange Queen**, which is superior.
- „ **alutaceum Prince of Orange**, clear apricot-orange, spotted black, a valuable dwarf showy Lily for flower-beds and massing in front borders, ht. 1 ft. per doz. 5/6 0 6
- „ **bicolor**, flowers large, apricot-orange, flamed scarlet, a distinct and beautiful Lily, ht. 1½ ft. per doz. 8/6 0 9
- „ **flore-pleno** (true), large handsome double flowers of a rich blood-crimson, *scarce*, ht. 1½ ft. 3 6
- „ **Leonard Joerg**, fine distinct Lily, bearing an umbel of large flowers, brilliant orange-red shading to golden, and slightly spotted crimson, handsome, ht. 2 ft. per doz. 12/6 1 3
- „ **Orange Queen**, a very handsome Lily, producing in mid-summer large orange-coloured flowers with small black spots; a strong robust grower, and very decorative in either pots or borders, ht. 15 to 18 in. **AWARD OF MERIT R.H.S. 1900**.....per doz. 17/6 1 8
- „ **Othello**, a beautiful hybrid bearing large handsome blood-red flowers tinged orange, a fine bold handsome showy Lily, ht. 1½ ft. per doz. 21/- 2 0
- „ **Peter Barr**, a grand new Lily, flowers very large, measuring 7 in. across, and of fine form, of a soft yellow colour with chamis tinge and shaded golden down the centre of each petal, almost without spots, ht. 1½ ft. **AWARD OF MERIT R.H.S., July 21st, 1903** 4 6
- „ **reticulatum**, a handsome freck-blooming variety, producing a head of flowers of a fine glossy salmon freely spotted purple, and with a yellow bar down centre of each petal per doz. 21/- 2 0
- „ **sanguineum**, flowers of medium size, rich crimson, finely spotted dark crimson, ht. 1½ ft. per doz. 6/6 0 7

LILIES—continued.

each—s. d

|| **Elegans semi-plenum**, large semi-double flowers, blood-crimson, ht. $1\frac{1}{2}$ ft.

		per doz. 12/6	1	3
„	Van Houttei , flowers rich blood-crimson, blotched with gold and spotted black, large and remarkably handsome, ht. $1\frac{1}{2}$ ft.	per doz. 6/6	0	7
„	venustum (<i>syn. armeniacum</i>), soft rich glowing reddish orange, late-flowering, a grand showy Lily, ht. $1\frac{1}{2}$ ft.	per doz. 21/-	2	0
„	Wallacei , a fine variety, producing from August to September several flowers of a glowing apricot-orange, ht. $2\frac{1}{2}$ ft.	per doz. 7/6	0	8
„	Willie Barr , fine large flowers of a bright orange-yellow, spotted crimson, very showy and beautiful, ht. $1\frac{1}{2}$ ft.	per doz. 5/6	0	6
„	Mixed varieties , for planting in wild gardens, shrubby borders, etc.			

Ω **Giganteum** (*The Himalayas*), the most majestic of Lillies, having stems 10 to 12 ft. high, when established, with large handsome heart-shaped leaves, and from July to August immense long white trumpet-shaped flowers. Groups of this noble Lily in large herbaceous and shrubby borders, woodlands, or wild gardens produce a grand effect. They should be planted in a half-shady position, where they can establish themselves and where the subsoil is fairly moist. The large flowering bulbs should be potted up and plunged in a cold frame and then be planted out in May, slight protection from early morning frosts being given. If foliage is made late in the season, after flowering, it must be protected during the winter with straw. The smaller bulbs are specially recommended for naturalising, and will bloom freely two or three years after planting.

	<i>Monster flowering bulbs</i>	7/6, 10/6 &	15	0
„	<i>Very large flowering bulbs</i>	3/6 &	5	6
„	<i>Smaller bulbs</i>	per doz. 15/- & 24/- ; 1/6 &	2	6
¶	Grayi (<i>North Carolina</i>), a strikingly handsome Lily from the Alleghany Mountains, flowers of distinct and elegant form, rich deep blood-crimson, interior spotted maroon-black and shading to golden-yellow, habit light and graceful, July-flowering, ht. 2 ft.	per doz. 17/6	1	8
	Hansoni — <i>The Japanese Yellow Martagon Lily</i> (<i>Japan</i>), large wax-like flowers with reflexing petals, bright golden-yellow, spotted crimson-maroon; one of the most beautiful and distinct of June-flowering Lillies, ht. 3 ft.; of easy cultivation. FIRST-CLASS CERTIFICATE R.H.S.	per doz. 15/-	1	6

|| **Henryi**, a most elegant Lily discovered by Dr. Henry in Central China; producing in August—September handsome branching heads of twenty or more flowers resembling in form *L. speciosum*, but of a soft orange-yellow colour; a hardy vigorous grower, attaining a height of 8 ft. Unlike other Lillies, it produces seed freely.....

Ω	Humboldtii (<i>California</i>), large handsome flowers of great substance, rich golden-yellow, spotted dark crimson, with recurved petals, very showy, ht. 5 ft., July-flowering. <i>This Lily requires to be established before blooming freely</i>	per doz. 21/-	2	0
"	" "			

Ω **Humboldti var. magnificum**, a grand form, surpassing the type in richness of colour and its free-flowering character; the large handsome flowers are of a rich deep golden, with large spots and blotches of blood-red. Established plants bear fifteen to twenty blooms on a spike, ht. $4\frac{1}{2}$ ft.; 90 per cent. of the bulbs may be expected to bloom the first year.

		<i>Strong bulbs</i> , per doz. 25/-	2	3
"	"	<i>Extra large bulbs</i>	3	6
Ω	Kelloggii , a graceful and beautiful Lily from California, bearing pretty soft pink flowers with closely recurved petals, fragrant, ht. 2½ ft. AWARD OF MERIT R.H.S. ...	per doz. 36/-	3	6

Ω **Krameri** (*South Japan*), a chaste and beautiful flower, delicate rose-pink, of elegant outline and graceful habit of growth, July-flowering, ht. 2 ft.

	<i>Strong bulbs</i> , per doz. 7/6 & 10/6 ; -/8 &	1	0
--	---	---	---

Lancifolium. See *Speciosum*.

Ω **Leichtlini** (*Japan*), bearing in August, on graceful stems, numerous handsome golden-yellow flowers, spotted crimson-purple, very beautiful, ht. 3 to 4 ft. In planting surround the bulbs with sharp sand

|| **Longiflorum**—**St. Joseph's Lily** (*China and Japan*), very beautiful Lillies, producing in June and July long snow-white trumpet-shaped flowers, which are deliciously fragrant. Greatly prized for pot-culture, and for flower-beds and borders. While in growth they require plenty of water.

	„	type , snowy white trumpet-shaped flowers, ht. 2 ft. ...	per 100, 32/6 ; per doz. 4/6	0	5
	„	formosum , a fine new free-flowering variety from Formosa, and a good forcer; its elegant trumpet-shaped white flowers are fairly uniform in character, but the foliage varies a good deal, ht. 2 to 3 ft. It is strongly recommended in preference to Harrisii . (<i>See Illustration</i>)	per 100, 60/- ; per doz. 8/6	0	9
„	„	<i>Extra large bulbs</i>	12/6	1	3

|| **Harrisii** (*The Bermuda or Easter Lily*), being an unreliable grower we recommend in its stead for forcing **Lilium longiflorum formosum**. If, however, **Harrisii** is specially wanted, we can supply it at 10/6 and 15/- per doz., and 1/-, 1/6, and 2/6 each, according to size of bulbs.

LILIES—continued.

LILIUM LONGIFLORUM FORMOSUM.

each—s d

|| **Longiflorum robustum**, also known as **Japonicum giganteum**, a strong and robust-growing Japanese variety, bearing large handsome white trumpet-shaped flowers of great substance; blooming later than the other Longiflorum varieties, ht. 3 ft.

„ „ A few monster bulbs „ 10/6 1 o

|| **Marhan**, a cross from *L. martagon album* and *L. Hansonii*, producing large elegant spikes of flowers with solid reflexing petals, deep yellow streaked brown and dotted crimson, June-July, ht. 3½ ft. per doz. 24/- 2 3

|| **Marhan "Miss E. Willmott,"** a very beautiful new hybrid Lily producing large elegant spikes of large flowers with reflexing petals, June to July, colour orange tinged carmine with crimson-purple spots, ht. 3½ ft. per doz. 36/- 3 6

|| **Martagon** (*Central and South Europe*), bearing early in July pyramidal heads of glossy light purplish rose reflexed flowers, spotted more or less with black, ht. 4 ft. per doz. 5/- o 6

Ω „ **album**, one of the most beautiful of Lilies, producing in July handsome pyramidal spikes of wax-like pure white reflexed flowers, ht. 4 ft. 2/6, 3/6 & 4 6

Ω „ **dalmaticum Catani**, a stately Lily which when established attains a height of 5 to 6 ft. and produces in July 3 or 4 flower spikes, each spike surmounted by several elegant reflexed flowers, of a dark glossy crimson-maroon shaded and spotted black per doz. 25/- 2 3

Ω **Monadelphum szovitzianum** (*syn. Colchicum*) (*Caucasus and North Persia*), bearing handsome spikes of large turban-shaped flowers of great beauty, clear citron-yellow, spotted black, ht. 3 ft. per doz. 12/6 1 3

„ „ Extra large bulbs, 2/- & 3 6

Ω **Myriophyllum**. See Novelty List, page 8.

Ω **Nepalense** (*Nepaul*), a greenhouse Lily of striking beauty, bearing in September large flowers with elegantly reflexing petals, soft yellow, shading off inside to a rich dark maroon, ht. 3 ft. Pot up the bulbs in a compost of loam, peat and sand, and plunge in a bed of fibre in a cool corner of the greenhouse, not giving any water until growth is showing. In sheltered gardens in Devonshire and Cornwall, this Lily may be grown out-of-doors

per doz. 15/- 1 6

Extra strong bulbs, per doz. 25/- & 35/-; 2/3 & 3 6

¶ **Pardalinum** (*California, etc.*), stately shade-loving Lilies, of elegant habit and producing in July heads of large, handsome, showy flowers; charming when naturalised.

¶ „ **type**, bright scarlet, shading to rich yellow, freely spotted purple-brown, flowers large, numerous and very handsome, ht. 5 to 6 ft. per 100, 32/6; per doz. 4/6 o 5

¶ „ **californicum**, the finest of all, flowers rich deep orange, handsomely spotted maroon, and tipped brilliant scarlet, ht. 3½ ft. per doz. 12/6 1 3

¶ „ **Johnsoni**, a handsome form from British Columbia, having a strong sturdy growth with dark green foliage and very showy flowers, colour glowing crimson shading to orange, ht. 5 ft. per doz. 15/- 1 6

¶ „ **Michauxi** (*The Carolina Swamp Lily*), flowers crimson-scarlet, shading to yellow, spotted maroon; later-blooming than the other varieties, ht. 4 to 5 ft. per 100, 25/-; per doz. 3/6 o 4

¶ „ **Red Giant**, a remarkably fine new Lily raised by *Mr. Luther Burbank*; it is a strong grower, bearing in July heads of blood-crimson flowers shaded red towards centre and profusely spotted dark maroon per doz. 36/- 3 6

LILIES—continued.

each—s d

- ¶ **Parryi** (*California*), a very beautiful species, with large bright yellow flowers lightly spotted and of delicate perfume, July, ht. 3 ft. FIRST-CLASS CERTIFICATE R.H.S. 2 6
- ¶ **parviflorum** (*California*), bearing a profusion of small elegant flowers, golden-yellow finely spotted brown and with golden anthers, beautiful, ht. 3½ ft. ...per doz. 15/- 1 6
- ¶ **Parvum** (*California*), flowers small and bell-shaped, of a bright yellow shaded red and freely spotted, showy, June-July, ht. 3½ ft. Extra strong bulbs, per doz. 24/- 2 3
- ¶ „ **var. luteum**, a very pretty Lily with flowers almost eup-shaped, colour orange, dotted maroon, June-July, ht. 3½ ft. per doz. 15/- 1 6
- ¶ **Philadelphicum** (*Canada and United States*), a graceful little Lily, bearing in July charming flowers, scarlet, shading to orange, elegantly spotted black, ht. 1 ft. per doz. 12/6 1 3
- Philippinense** (*Philippine Islands*), a remarkably graceful and beautiful Lily, suitable for pot culture in greenhouse (treatment as for *L. nepalense*); it bears on a slender leafy stem one long white trumpet-shaped flower with reflexing petals, sweetly scented, ht. 2 ft. per doz. 8/6 0 9
- ¶ **Pomponium verum** (*Lombardy, etc.*), a beautiful June-flowering Lily, with very graceful foliage, flowers reflexed and of a rich sealing-wax scarlet colour, ht. 2 to 3 ft. per doz. 1c/6 1 0
- ¶ **Pyrenaicum flavum** (*Pyrenees*), the **Yellow Turk's-Cap Lily**, having a leafy stem surmounted by an elegant umbel of pendent flowers with reflexed petals, yellow shaded green, finely dotted black and with scarlet anthers, *June-flowering*, ht. 3 ft. per doz. 5/6 0 6
- „ **rubrum**, producing an umbel of drooping flowers with reflexed petals, orange-scarlet spotted maroon, anthers scarlet, *June-flowering*, ht. 2 to 3 ft. per doz. 8/6 0 9
- ¶ **Roezlii** (*true*), a *rare Lily* from the Pacific coast, bearing in June an elegant raceme of brilliant orange-red flowers spotted purple and with reflexed petals, ht. 3 ft. per doz. 21/- 2 0
- δ **Rubellum**, a beautiful little Japanese Lily with slender growth like that of *Krameri*, while the flowers are of distinct elegant form, delicate pale rose, with golden anthers; it has been found to thrive best out of doors in a partially shady situation in a compost of loam, leaf soil, and stones; it makes a lovely pot-plant (2 or 3 bulbs in a pot) and may be gently forced into bloom by end of May, ht. 1½ ft. per doz. 10/6 & 15/-; 1/- & 1 6
- ¶ **Speciosum** (*syn. lancifolium*) (*Japan*), a remarkably beautiful section of Lilies flowering in late summer and early autumn; the flowers are large and handsome with reflexing petals and last a long time in water when cut.
- „ **album**, handsome white flowers of firm texture, ht. 3 ft. Strong bulbs, per doz. 7/6 0 8
- „ „ **Crown Princess**, a very floriferous variety, bearing a large number of fine white flowers, ht. 3 ft. AWARD OF MERIT. p. doz. 9/6 0 10
- „ „ **Kraetzerei**, extremely beautiful large white flowers of great substance, with dark orange-coloured anthers, ht. 3 ft.
- „ „ „ Strong flowering bulbs, ...per doz. 10/6 1 0
- „ „ „ Extra strong bulbs, ... „ 12/6 1 3
- „ „ „ A few monster bulbs, per doz. 15/- & 21/-; 1/6 & 2 0

Barr's Sweet-scented Double Chinese Pæonies, for Autuma planting.

For full Descriptive List and hints on culture see Barr's Hardy Plant Catalogue.

× LILY OF THE VALLEY,

For forcing, and making plantations out of doors.

FORTIN'S GIANT LILY OF THE VALLEY.

The Berlin Forcing Crowns offered below we recommend for general forcing, to come in after Christmas. For flowering before and at Christmas the Retarded Crowns should be used. For outdoor culture the Planting Crowns are recommended.

DIRECTIONS FOR FORCING.

Plant 15 to 20 crowns in a 5-inch pot, shaking in a little light soil amongst the roots, until they are tightly potted; leave the crowns free above the soil and a little below the rim of the pot. Place on bottom heat in a moist atmosphere, with a temperature of 80 to 85 degrees (if forced in March a temperature of 70 to 75 degrees will be sufficient), and cover the crowns with a little cocoa fibre or moss, which remove when top growth is showing. Tepid water should be frequently given, care being taken that it penetrates to the centre of the clump. To encourage simultaneously the development of flower and foliage, keep a flower-pot inverted over the crowns, until flower and foliage have made some progress, when gradually admit light. A dry atmosphere, or an insufficient supply of water at the roots, will cause the crowns, technically speaking, to go "blind." Where large quantities of Lily of the Valley blooms are required for cutting, the crowns should be planted rather thickly in boxes and receive the treatment described above.

OUTDOOR CULTURE OF LILY OF THE VALLEY.

Out-of-doors the Lily of the Valley likes a partially shaded and moist situation. The best results are obtained on a shady border against a wall, placing the crowns 6 to 9 inches apart and leaving them to establish themselves. The soil should be a good loam enriched with manure and a top dressing of old manure should be given annually. The plants should not be allowed to remain more than three years in one spot.

- × **Barr's Finest Berlin Forcing Crowns**, of finest selected quality, suitable for general early forcing per 1000, 65/-; per 100, 7/-
- × **Barr's Improved English "Alexandra" Crowns**, bearing sturdy spikes well clothed with large handsome bells; this strain is *especially suited for outdoor culture*, but may also be potted and very slowly forced in February or March (not earlier)..... per 100, 8/6; per doz. 1/3
- × **Fine Selected Berlin Planting Crowns**, for outdoor beds, and naturalising in woods, etc..... per 1000, 42/-; per 100, 4/6
- × **Strong selected clumps**, for outdoor planting or slow forcing in pots.
per doz. 10/6; each 1/-
- × **Fortin's Grand Giant Strain**, a very beautiful strain with remarkably large handsome bells on long sturdy stalks. The **extra strong crowns** offered may be potted and brought on *very slowly* under glass, but they must not be potted or boxed up before February; ordinary forcing will cause them to go *blind*.

Extra strong crowns, per 100, 16/6; per doz. 2/4

„ „ Strong Planting crowns for planting in beds and borders „ 10/6; „ 1/6

RETARDED LILY OF THE VALLEY,

Suitable to force for Autumn, Winter and Summer flowering.

The earlier plantings of the Berlin Retarded Crowns will give bloom in about three weeks, but the crowns started in November and December require a little more time. It is necessary that they be planted *as soon as received*, and grown on rapidly without any check. In June, July, and August all that is needed is to place them in a cold frame, and they come along quickly with very little attention. Later on however, when the nights become cool, the temperature must be raised to that of the day. Failures sometimes occur with these retarded crowns in October, November, and December because they are not given the warmth they require at night.

The plants should be kept fairly dry overhead, and a warm moist atmosphere should be maintained. As the retarded crowns make a vigorous foliage it is advisable to remove one out of three leaves, as this will assist the development of the flower spike.

Finest Berlin Retarded Crowns, supplied as required *all the year round*.

per 100, 9/6; 25 for 2/6; 12 for 1/4

Finest Selected Fortin's Giant Retarded Crowns, supplied as required from September to December and March to June. These take a few days longer to develop their flowers than the Berlin Retarded Crowns..... per 100, 21/-; 25 for 5/6; 12 for 3/-

LYCORIS.

Plumosum (Ostrich Feather or Plume Hyacinth), bearing large broad plume-like heads of a pretty mauve colour per 1000, 35/-; per 100, 4/-

Any other species of *Muscari* in commerce not mentioned above can be supplied if required.

NARCISSUS POLYANTHUS, or NOSEGAY DAFFODILS.

POLYANTHUS NARCISSUS, PAPER-WHITE
"SNOWFLAKE" CROWN IN BOWL.

The **Polyanthus Narcissi** or **Nosegay Daffodils** produce large heads of sweet-scented flowers, and are specially adapted for Winter and Spring decoration in pots and jardinetts, etc. The culture is the same as for Hyacinths. For flower beds and mixed borders they are great favourites, and produce a charming effect. Plant from September to November, and at the approach of winter give a light covering of long litter or other material to keep off severe frosts; remove the covering in March. The earlier plantings give the best results.

Where flowers are in demand from November to January, the **Paper White "Early Snowflake"** and **Double Roman Narcissi** are of great value for forcing with the Roman Hyacinths (see *Culture*, page 2).

Barr's Selections of Polyanthus Narcissi or Nosegay Daffodils.

Double Roman Narcissus , producing umbels of double white flowers with orange nectary; by gentle forcing it may be brought into bloom early for greenhouse decoration	1	3...0	2			

For full Descriptive List of Narcissi or Daffodils, see **Barr's Daffodil Catalogue**.

NARCISSUS POETAZ—NEW HYBRID POLYANTHUS NARCISSI.

(Hybrids of *Polyanthus Narcissi* x *Narcissus poeticus ornatus*.)

A very decorative new class of **Nosegay Daffodils** or **Polyanthus Narcissi**, growing taller than the old varieties, with a less stiff habit, and a looser head of flowers, which are larger and more elegantly formed. They also have the merit of being much hardier. Besides being good border plants they are valuable for culture in pots and jardinetts, and will bear gentle forcing. The flowers of these new Narcissi are all delightfully fragrant, and will be found of great value to cut for vases or bouquets.

Aspasia, flowers large and bold, four to five on a stem, with broad solid white perianth and bright yellow cup, very prettily fluted, ht. 21 in.....per 100, 10/6

THE CHINESE SACRED LILY GROWING IN BOWL

This species of *Polyanthus Narcissus*, which we annually import from Northern China, is prized for the abundance of its flowers and its marvellously rapid growth. The flowers are white, with yellow cup, and very fragrant; they are mostly single, but a few double are sometimes found amongst them. Each bulb produces several flower-spikes, bearing many flowers. In China and Japan the bulbs are grown in the living-rooms in fancy bowls filled simply with *pebbles and water*, and the natives compete with one another in growing the finest specimens for their New Year's Festival, successful culture being regarded as an emblem of "Good Luck." The bulb in this country can be grown as successfully as in China, in pebbles and water or fertilised fibre mixture (*see page 2*), and it is most interesting to watch its rapid growth, which is about 20 inches in forty days; place in a sunny window by day and on a table near the centre of the room by night, as frost destroys the flower-buds. The natural atmosphere of a warm greenhouse is of course most suitable, and we can strongly recommend this flower for CHRISTMAS FORCING. *Fuller particulars of culture are supplied with the bulbs.* In Cornwall and the warmer parts of the South of England the bulbs after blooming may be planted out to a sunny corner of the garden and covered with heather until the spring; they should there be left to establish themselves, and if protected slightly each winter, give an abundance of early flowers.

Orders booked for immediate delivery on arrival, which we expect to be early in October. each—s. 3d

NARCISSUS or DAFFODILS. *See Daffodil Catalogue.*

each—s. 4.

Fothergilli major, a grand plant, producing in early autumn large umbels of handsome crimson-scarlet flowers, ht. 1½ ft. *Strong selected bulbs*, per doz. 36/- 3 6

NERINE—continued.

each—s. d.

- sarniensis** (Guernsey Lily), a most brilliantly coloured Autumn flower of elegant form; colour vivid crimson-scarlet, sparkling in the sun as if bespangled with gold, ht. 1 to 1½ ft. Bulbs with flower-bud to bloom this Autumn will be supplied if possible per doz. 10/6 1 0
- undulata** (*syn. crispa*), producing small pale rose-coloured flowers, petals elegantly curled, a little gem for the greenhouse, ht. ¾ ft. per doz. 15/- 1 6
- new hybrids.** See Novelty List, page 9.

ORNITHOGALUM (Star of Bethlehem), very pretty hardy bulbs, flowering in Spring and early Summer. PYRAMIDALE, NUTANS, and UMBELLATUM are charming plants for naturalising in woodlands, meadows, etc.; the two latter will thrive in dense shade where few other plants will grow.

- arabicum**, bearing in June handsome fragrant white flowers with glistening black central boss and yellow anthers. Well-grown specimens produce heads bearing as many as 20 flowers, measuring 2 inches across. Plant on warm sunny south borders 6 inches deep, and slightly protect during winter; by slight forcing it may be had in bloom by Easter, ht. 1½ ft. After flowering the bulbs should be well ripened off, if out-of-doors, by placing a hand-light over them, or if in pots by exposing them to full sun. The bulbs we are supplying this year have been specially grown for us in a hot climate and may be expected to bloom more freely than the bulbs usually sent out ...per 100, 32/6; per doz. 4/6 0 5
- montanum**, a very pretty dwarf species, with umbels of starry white flowers, ht. ¼ ft.; a most valuable bulb for massing and edgings, also useful for naturalising in grass, woodlands, etc. per 100, 7/-; per doz. 1/- —
- narbonense**, resembling *O. pyramidale*, but of more graceful habit „ 3/6 0 4
- nutans**, elegant spikes of silvery grey flowers, outside shaded pale sea-green, beautiful; valuable for cutting and naturalising in woodlands, etc., ht. 1 ft. per 100, 8/6; per doz. 1/3 0 2
- pyramidale**, a very beautiful bulbous plant, producing in early June large spikes of beautiful snowy white flowers; very attractive in borders, ht. 2 ft. per doz. 3/- 0 4
- umbellatum**, the old Star of Bethlehem, producing in late Spring umbels of starry white flowers, ht. 1 ft.; valuable for naturalising...per 1000, 25/-; per 100, 2/9; per doz. 5d. —
- umbellatum splendens**, a large handsome form of the above, bearing handsome umbels of pure white starry flowers; very effective in masses and edgings, and valuable to naturalise, ht. 1½ ft. per 1000, 30/-; per 100, 3/6; per doz. 6d. —

OSTROWSKYA magnifica, a grand herbaceous perennial, bearing in summer immense bell-shaped flowers 6 inches in diameter, satiny white with silvery lilac sheen, ht. 3 ft. FIRST-CLASS CERTIFICATE R.H.S. Plant in a light well-drained gritty or sandy soil against a sunny wall, and slightly protect in spring Strong roots 2 6

OXALIS (Wood-Sorrel), remarkably pretty little subjects delighting in hot dry positions on rock-work, etc., planted in a light sandy soil. In autumn they should be lifted and stored in dry soil or sand, being potted up in early spring for cold greenhouse, or planted out later for summer blooming. They all make pretty pot-plants.

cernua var. bermudiana (The Bermuda Buttercup), a charming bulb for Winter flowering indoors, producing elegant terminal clusters of graceful bright yellow flowers for weeks. Pot up early in autumn, and then place in a sunny window, or greenhouse; the bulbs may also be potted later, kept in a frame, and planted out in spring.

- per 1000, 32/-; per 100, 3/6; per doz. 6d. —
- × **floribunda**, producing from summer to autumn a profusion of charming rose-coloured flowers, with dark veins, ht. 8 in. per 100, 8/6; per doz. 1/3 0 2
- × „ **alba**, flowers white, beautiful, ht. 8 inches. „ 8/6; „ 1/3 0 2

× **POLYGONATUM** (Solomon's Seal, or David's Harp), very graceful shade-loving plants, valuable for naturalising in woodlands, wild gardens, shady flower borders, etc. each.
s. d
They make very elegant pot-plants, and may be forced into bloom by February.

POLYGONATUM MULTIFLORUM GROWING IN A POT.

- macrophyllum**, the **Large-leaved Solomon's Seal**, very handsome, ht. 3 ft.
per 100, 10/6; per doz. 1/6 o 2
- multiflorum**, the **Tall Solomon's Seal**, a fine bold plant of graceful habit, having arching leafy stems with pendent white flowers, ht. 2 ft.
per 100, 8/6; per doz. 1/3 o 2
- officinale**, the **Dwarf Solomon's Seal**, of dwarf graceful habit with elegant white flowers, ht. 1 ft. per 100, 9/6; per doz. 1/4 o 2
- Thunbergii**, bright shining green broad foliage and clusters of large waxy white pendent flowers, tipped green, on arching stems, ht. 1½ ft. per 100, 17/6; per doz. 2/6 o 3
- verticillatum** (true), a very distinct and elegant tall-growing species producing numerous whorls of foliage and cream-coloured flowers, ht. 2½ ft. per 100, 17/6; per doz. 2/6 o 3

PUSCHKINIA scilloides compacta (The **Lebanon Squill**), a beautiful little April-flowering bulb, prized for the permanent flower border and for rockwork; it is also a lovely indoor pot-plant (6 bulbs in a pot); the flowers are white, shaded and striped soft clear blue, ht. 6 inches
per 1000, 30/-; per 100, 3/6; per doz. 6d.

RANUNCULUS, Turco-Persian, Turban and Persian, ht. ¾ ft.

Nothing produces a brighter or more gorgeous effect in May and June than beds of Ranunculus; the flowers are all good for cutting, and the culture is very simple. They thrive in any ordinary garden soil, but should have protection in spring from sharp winds.

CULTURE.—Plant the **Double Turban Ranunculi** from November to March (the earlier the better), and the **Turco-Persian** and **Persian** during February and March. Set the tubers 3 or 4 inches apart, pressing them firmly into the soil, *claws downwards*, and covering them with sand, then with soil; keep the crown of the tuber two inches under the surface. After planting cover the ground with *cut heather, or other light material*, which remove when the plants appear above ground. In April a slight mulching of well-decayed manure will be found beneficial, and during dry weather the plants should be given abundance of water. If grown as pot-plants put three tubers in a 4-inch pot, and plunge out of doors for a time.

RANUNCULUS, Double Turban or Turkish for Bedding.

The flowers of the **Turban Ranunculus** are large, rose-like, and self-coloured. In beds, ribbons, and masses in the borders, the rich *yellow*, bright *orange*, brilliant *scarlet*, beautiful *rose-carmine*, and pure *white* flowers are very effective in spring.

Fine Mixed Varieties, containing a very good assortment of colours „ 21/-; „ 2 3

RANUNCULUS asiaticus superbus—Sicilian Strain, a remarkably pretty and distinct strain of large-flowered Ranunculi with double, semi-double, and single flowers of the most brilliant and varied colours, the petals of many being elegantly flanged and cut per 1000, 35/-; per 100, 4/-; per doz. 7d.

RANUNCULUS, Double Persian, for Beds, Borders, and Masses, very attractive on account of their finely formed very double flowers, and their rich varied brilliant colours.

Extra fine mixed, a magnificent variety of colours, for beds, borders, and masses per 1000, 21/-; per 100, 2/3

RANUNCULUS—Single Scarlet from Palestine, flowers single, brilliant vermilion to orange-scarlet, with prettily crinkled petals and a black central boss; a very showy plant for flower beds and borders. Plant out of doors in February or March, or the roots may be potted up earlier and gently forced per 100, 7/6; per doz. 1/3

× **RICHARDIA (Galla or Arum Lily)**, a charming family of greenhouse plants. **R. africana** and its varieties should be grown out of doors during Summer and be brought into the greenhouse at the approach of Winter. The other species should be kept dry, away from frost during Winter, and be started in a gentle bottom heat in February or March. They may then be grown on in pots for greenhouse decoration or planted out of doors in a sheltered position in May. In the latter case the natural soil should be taken out to a depth of 9 inches, and be replaced by a rich compost, as these plants are gross feeders. Abundance of water should be given as growth proceeds. **Albo-maculata, hastata** and **Mrs. Roosevelt** may also be planted out of doors in a dry state in April for Summer-flowering.

africana (*syn. æthiopica*), **The Lily of the Nile**, large white trumpet-shaped flowers each—s. d established plants in pots, per doz. 18/- & 30/-; 1/9, 2/6 & 3 6

„ **Little Gem**, a beautiful miniature variety in pots, per doz. 5/6 0 6

„ **Pearl of Stuttgart**, a valuable new dwarf compact-growing variety bearing profusely and for a long period, large flowers of the purest white and of great substance; a charming pot-plant in pots, per doz. 7/6 0 8

albo-maculata, flowers white, foliage dark green beautifully spotted white, extremely effective in pots, beds, and borders per 100, 12/6; per doz. 1/9 0 2

× „ „ **alba**, pure white, ht. $2\frac{1}{2}$ ft... } ing culture similar to Dahlias, { „ 6/6 0 7

SANGUINARIA canadensis (**Blood-root or Puccoon**), a very charming spring-flowering hardy plant with a pretty glaucous Colt's-foot-like foliage and flowers measuring an inch across, pure white with a tassel of yellow stamens, ht. $\frac{1}{2}$ ft.; suitable for shady spots, rather moist peaty soil per doz. 6/6 0 7

SCHIZOSTYLIS coccinea (**Caffre Lily or Crimson Flag**). See page 93.

SCILLAS—Early-flowering. The effect in early Spring can hardly be overestimated of the intense brilliant blue of *Scilla sibirica*, and the deep blue of *S. bifolia*, contrasting with the snowy whiteness of the Snowdrop and varied hues of the Crocus. As edgings and masses in beds and borders they are most valuable. *Bifolia* and *Sibirica taurica* are the first to bloom. All suitable for naturalisation and permanent flower borders. In pots or jardinetts, alone or with other bulbs, they form a pleasing variety amongst indoor plants.

SCILLAS—continued.

each—s. d

Sibirica (The Siberian Squill), producing spikes of bright blue flowers, ht. 3 in.

Verna, lovely little heads of lilac-blue flowers; charming for naturalising on rockwork, etc., ht. 3 in. each 5d. 4 6

SCILLAS (Wood Hyacinths)—May-flowering. Our native species (*Scilla nutans*), with its long pendent bells, abounds in most parts of the country. The fine Spanish varieties (*S. hispanica*) have erect flower-spikes and open campanulate flowers. *Scilla patula* and its varieties have a robust tall habit with large campanulate open flowers. All are very effective in flower and shrubby borders, and most valuable for wild gardens and woodlands, where they should be largely naturalised; they seed freely and quickly establish themselves. They also make charming pot-plants, and may be forced into bloom by March. **Wood Hyacinths** succeed in shady flower borders and bare shady places, and odd corners which often have a desert-like appearance in the flower garden can by their use be rendered bright and cheerful. They will also thrive under fir and pine trees, where few other plants will grow. Plant 6 inches deep to obtain fine flower-spikes.

Hispanica (*syn. Campanulata*), plants of erect habit, with spikes of open campanulate flowers.

,, **aperta**, porcelain-blue, striped white, very pretty and distinct, ht. 15 in. per 1000, 42/- 4 6...o 8

TECOPHILÆA cyanocrocus (Chilian Crocus), a most beautiful Chilian Spring-flowering bulb, bearing large Crocus-like flowers ranging from dark to light blue with white throat, delicately scented, ht. $\frac{3}{4}$ ft. It is easily grown in the south of England and mild districts in a deep sandy loam well drained, and exposed to full sun. In cold districts the bulbs should be given a cold frame treatment but no artificial heat. When established, it blooms freely each year. Plant the bulbs in October 7 6

× **THLADIANTHA dubia**, a rapid-growing climber for covering trellises, arbours, etc., with heart-shaped bright green leaves and bright yellow flowers during Summer.....per doz. 3/- 0 4

× **TIGRIDIA Pavonia** (The Tiger Flower of Mexico).

Few flowers are so gorgeously coloured as the *Tigridias*. The bulbs are supplied from December to May; for greenhouse decoration, pot up as soon as received and plunge in a cold frame, withholding water till the foliage appears, then giving sparingly at first. Those bulbs intended for outdoors should be stored in soil or peat (not quite dry) away from frost, till March, and then be planted in sunny positions in the flower border in well-drained soil, the bulbs being surrounded with sand. Beds of *Tigridias* make a gorgeous picture during July, August, and September, and should find a place in all gardens.

COLLECTIONS OF TIGRIDIAS.

12 bulbs each of 6 varieties..... 8/6 | 6 bulbs each of 6 varieties..... 4/6

TIGRIDIA—continued.

TIGRIDIA GRANDIFLORA ALBA.

TRILLIUM. See page 93.

TRITELEIA. See Milla.

TRITONIA, charming little hardy Cape bulbous plants producing in Summer showy flowers ranging in colour from buff to rose and the richest glowing orange, and having a beautiful transparency. Grown in pots they are most decorative. Culture same as for *Ixias*.

3 each of 10 splendid varieties, 5/6

Mixed varieties per 100, 6/6; per doz. 1/- each—s. d —

crocata, bearing racemes of large brilliant orange-scarlet flowers, remarkably showy, ht. $\frac{1}{2}$ ft. Strongly recommended for south borders, terrace vases, or pots, etc. per 100, 15/-; per doz. 2/3 o 3

„ **Prince of Orange**. See Novelty List, page 9.

rosea (*syn. Montbretia rosea*), a charming graceful bulbous plant, producing in summer elegant spikes of pretty rose-coloured tubular flowers, ht. $1\frac{1}{2}$ ft. per 1000, 42/-; per 100, 4/6; per doz. 8d. —

TROPÆOLUM, all beautiful climbers. **Jarrattii** we recommend for the greenhouse to trail over trellises, round pillars, etc. **Polyphyllum** and its variety **Leichtlini** revel on dry sunny slopes and sunny spots on rockwork and border. **Tuberosum** requires an open sunny situation and poor soil, and should have branches to ramble over.

Jarrattii, flowers scarlet, orange, and black, an exceedingly showy species per doz. 5/6 o 6

polyphyllum, golden-yellow flowers in long trusses, quite hardy „ 6/6 o 7

„ **Leichtlini**, flowers of a rich brilliant orange-gold, very showy and beautiful. AWARD OF MERIT, 1901 per doz. 8/6 o 9

× **speciosum**, see our Spring Catalogue of Bulbs and Tubers.

× **tuberosum**, flowers yellow and red, very showy; plant in Spring and lift in Autumn. The dried tubers are eaten by the natives of Peru, and in Bolivia they are boiled and then frozen, being much esteemed as a delicacy per doz. 2/6 o 3

× **TUBEROSE**. This valuable sweet-scented flower is too well known to need description. For early flowering pot the bulbs as soon as received, and plunge the pots in a temperature of about 60 degrees. Keep the bulbs for succession dry, or pot at once to make root growth; in either case the temperature should not be below 50 degrees, or the bulbs will suffer.

Double American Dwarf, “**Excelsior Pearl**,” the finest strain, having large pure white double flowers of delicious fragrance. Orders booked for supply from January to May.....Extra strong bulbs, per 100, 17/6; per doz. 2/6 o 3

Sweet-scented Double Chinese Pæonies, for Autumn planting.

For full Descriptive List and hints on culture see Barr's Hardy Plant Catalogue.

BARR'S FAMOUS TULIPS.

AWARDED

Six Gold Medals by the Royal National Tulip Society, and many other High Awards at the London Spring Flower Shows.

Tulips are extremely hardy, and of easy culture, flowering freely in either sunny or shady situations, and developing their handsome showy flowers even in a confined town garden. By a judicious selection of Single, Double, and May-flowering Tulips, a most brilliant display of colours may be maintained in the garden from early April to end of May. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the Tulips *Scilla sibirica*, *Chionodoxas*, *Snowdrops*, and *Crocuses*; these flower first, and when out of bloom the leaves form a charming green groundwork for the blossoms of the Tulip. The large breadths of Tulips in bloom at our Nurseries in Spring are a sight worth seeing, and attract a great many visitors. See Illustration on back cover.

BARR'S EARLY SINGLE TULIPS FOR FORCING.

The following varieties of Early Single Tulips are the most suitable for forcing. As failure in forcing Tulips and other bulbs is generally due to bringing the pots into warmth too early or before the bulbs have rooted sufficiently, we have given on page 2 a few practical hints on general treatment which if followed will produce satisfactory results.

- (1) Indicates those varieties which should be used for earliest forcing to come in at **Christmas and early January.**
- (2) Varieties for second-early forcing to come in from **end of January to early March.**
- (3) Varieties for later forcing to come in from **middle of March to early April.**

For full descriptions see General List of Early Single Tulips, pages 72 to 74.

BARR'S EARLY SINGLE TULIPS FOR BEDDING.

Culture Outdoors.—Any ordinary garden soil enriched with old stable manure, with a sprinkling of quicklime dug in while fresh, suits the Tulip. Planting out of doors should take place from *October to November*, not earlier. On light soils the bulbs should be planted 4 to 5 inches deep; on heavy soils 3 to 4 inches deep. Early Single Tulips should not be planted two years running on the same piece of ground.

Arrangement of Colours in Bedding.—The following varieties if bedded together produce charming effects: *Princess Marianne*, *Ophir d'Or* and *Wouwerman*; *Pottebakker White* and *Chrysolora*; *Prince of Austria*, *President Lincoln* and *Chrysolora*; *Rose Grisdelin* and *Princess Marianne*; *Pottebakker Yellow* and *Thomas Moore Improved*; *Chrysolora* and *Dusart*; *Princess Ida* and *Rosamundi*; *Duchesse de*

TULIPS, EARLY SINGLE, FOR BEDDING—*continued.*

Parma and *Fabiola*; *Rosamundi* and *Stanley*; *Couleur Cardinal* makes a grand show bedded by itself, but *Snowdrift* goes well with it; *Keizerskroon* makes a fine bed with *La Reine* as an outside border. *Golden Queen* is a grand bedder.

Time of Flowering.—The order of flowering is indicated by (1), (2), (3), (4), or (5) after the name. The difference in time of flowering between each number is not great, so that (1) and (2) may be bedded together, also (2) and (3), and so on.

☞ Full descriptions will be found in our General List of Early Single Tulips.

BARR'S EARLY DOUBLE TULIPS FOR FORCING.

Generally speaking Double Tulips will not bear such early forcing as Single Tulips. The following sorts are those we recommend for the purpose. The numbers 1, 2, and 3 refer to the relative periods for which they may be forced. For general cultural directions, see page 2.

(1) Indicates those varieties which may be forced to come in the middle of January; (2) those to come in from end of January to early March; and (3) the varieties to come in at end of March and early April.

 Full descriptions will be found in our General List of Double Tulips.

Annuals for Autumn Sowing.

List of Hardy Annuals suitable for September sowing in the open for early Spring display, sent on application.

BARR'S GENERAL LIST OF DOUBLE TULIPS.**Plant from October to November.**

Double Tulips have massive flowers of brilliant and beautifully diversified colours, and are very effective in beds on lawns, terraces, etc., also as edgings to beds of Roses and Rhododendrons and to shrubberies. Planted in groups of five or more, they are very attractive. *Plant the bulbs four inches deep and four to six inches apart.*

Time of Flowering.—The numbers in brackets after the name indicate the order of flowering, and will assist amateurs in making their selections for bedding, thus:—(1) corresponds in time of flowering with (1) of the **Single Tulips**; (2) corresponds with (2) of the **Single Tulips**, and so on. The heights, as registered at our Nurseries, are given in inches. By a judicious selection of Double and Single Tulips, a display of brilliant colours may be maintained in the garden for a long period.

Double Tulips should be planted three bulbs in a pot, and receive the cultural treatment recommended on page 2.

PARROT, or DRAGON TULIPS, with Lacinated Petals (May-flowering).

These Parrot, or Dragon Tulips, have large characteristic blossoms with curiously lacinated petals, and richly varied shades of beautiful colours in the same flower. They are very remarkable and exceedingly showy and effective in flower borders, while if grown in hanging baskets the drooping flowers look like orchids. In height they average about 15 inches, and bloom with the *Cottage and Darwin Tulips*.

The following are all selected extra strong bulbs, superior to what are often sold, and may reasonably be expected to bloom; but as in some seasons the Parrot Tulips are rather shy in flowering, to ensure a good display in flower beds and borders it is wise to plant the bulbs only 4 inches apart.

12 bulbs each of 6 beautiful varieties, 7s.; 6 each, 3s. 9d.

	per doz.—s. d			per doz.—s. d	
Amiral de Constantinople , glossy scarlet, shaded and tipped orange, showy	per 100, 7/6	1 3	Large Yellow , pure yellow, slightly striped crimson and green, a showy and beautiful flower	per 100, 7/6	1 3
Coffee-Colour , shaded reddish brown on a yellow ground, slightly striped crimson and green. <i>Inclined to sport</i> ...per 100, 7/6	1 3		Markgraaf Van Baden (true), golden inside, outside shaded and feathered brilliant scarlet, purple and green; remarkably handsome and the most gorgeously coloured of all Parrot Tulips, per 100, 7/6	1 3	
Crimson Beauty , rich deep blood-crimson, with blackish markings, flowers of immense size and very handsome; this variety should be largely used in beds, borders, and baskets, as nearly every bulb flowers freely and produces a most brilliant effect. CERTIFICATE OF MERIT R.B.S.	per 1000, 70/-; per 100, 7/6	1 3	Perfecta , golden-yellow, heavily blotched rich deep scarlet, a showy and beautiful flower	per 100, 7/6	1 3

BARR'S Beautiful "Cottage" Tulips and Tulip Species.

All Single and mostly May-Flowering.

Awarded the National Tulip Society's Gold Medal (First Prize) at the Temple Gardens Show, May 24th, 1911.

The name **Cottage Tulips** we have given to the various beautiful May-flowering Tulips which have mostly been found growing in old cottage gardens in England, Scotland, and Ireland, where they have been in some cases for over fifty years. Some have also been traced to old French gardens. They are all very beautiful, presenting a great variety in form and colouring, and having none of the stiffness of other Tulips. For cutting they are greatly prized on account of their long stems and graceful habit. Being extremely hardy they are specially adapted for permanent hardy flower borders, where they should be freely planted in large clumps and masses. They may also be naturalised in grass, wild gardens, etc., where during May they present a charming picture. Those who have visited **Kew Gardens** in Spring will have noticed these Tulips planted freely in grass, and also used largely in *filling flower beds* on the lawns.

Culture.—The bulbs should be planted 5 to 6 inches deep on heavy soils, and 6 to 7 inches deep on light soils. If planted too shallow they are apt to come blind.

In most cases we give the heights as registered at our Nurseries, but these will vary somewhat according to richness or poverty of soil.

Time of Flowering.—The Cottage Tulips take up the succession of flowering as the Early Single and Double Tulips are going out of bloom. As far as possible we have indicated the order of flowering by (1), (2), and so on. (1) will correspond in time of flowering with (5) of the Early Single and Double Tulips. The Parrot Tulips bloom together with those marked (2), and the Darwin with those marked (3) and (4) in the following lists.

COTTAGE TULIPS AND TULIP SPECIES—continued.

☞ Those Tulips marked ☞ are species, and gems for sunny sheltered nooks in the rock garden, where their lovely flowers will delight the eyes of all who see them. They should be planted 3 to 6 inches deep in light sandy well-drained soil.

BARR'S GRAND DARWIN TULIPS.

All Single and May-flowering.

DARWIN TULIPS.

The large breadths of these grand Darwin Tulips at our Nurseries present in May a gorgeous sight and attract a great many visitors. At the Temple Gardens Show last May our exhibit of Darwin Tulips was awarded the National Tulip Society's Gold Medal.

For flower beds and borders we confidently recommend the following varieties for their stately bearing and rich colours. They have been specially selected as being distinct, showy, and beautiful, so that buyers need have no hesitation in choosing the colours they require, as all are good. The cut flowers form an elegant decoration for vases, and last a long time in water. The lighter lilac and heliotrope-coloured varieties blend charmingly with yellow "Cottage" Tulips such as *Mrs. Moon*, *Vitellina*, *Gesneriana lutea*, *lutea pallida*, *flava*, and *Golden Spire*, etc.

On heavy soil the bulbs should be planted 5 to 6 inches deep, and on light soils 6 to 7 inches.

By gentle forcing in pots these grand Tulips may be had in bloom by March, and will be found of great value for indoor decoration on account of their lovely soft colours and tall stately bearing. The centres of many are most beautifully marked.

In most cases we give the heights as registered at our Nurseries, also the order of flowering in relation to the flowering period of the **Cottage Tulips**, (1) being the first to open and (5) the latest.

BARR'S "Gold Medal" ENGLISH FLORIST TULIPS.

Awarded Seven Gold Medals by the Royal National Tulip Society.

These beautiful May-flowering English Tulips have been prized by all lovers of the true Florist's Flower for over a century. The flowers are of perfect goblet form, and their beautiful and symmetrical markings quite unique.

CULTURE OF ENGLISH TULIPS.—Any good loamy garden soil suits the "English Tulip." The bulbs should be planted four inches deep and four inches apart, from the end of October to middle November, choosing a day when the ground is in nice friable condition; avoid planting when the ground is wet.

HINTS TO EXHIBITORS AND TULIP AMATEURS.—As the English Tulip often suffers much from hail and wind during Spring, it is a good plan, when choice named sorts are grown, to erect over the bed a skeleton framework on which a covering of calico or white canvas is fastened in February or March, leaving the sides open till the buds show colour, when the covering may be brought down over the sides too. By this means hail, rain, and very hot drying sun are kept off, and the flowers open in all their purity, while the period of flowering is prolonged by some weeks.

☞ To those who wish to know all about the English Tulip, we recommend "The English Tulip," a little pamphlet containing the lectures delivered on this flower at the great Tulip Conference of the Royal National Tulip Society, held at *Royal Botanic Society's Gardens*, May 12th, 1897, price 1s.

BARR'S SELECTIONS OF ENGLISH FLORIST TULIPS.

25 in 25 Beautiful Varieties, *Bizarres, Byblæmen, and Roses* ... 10/6, 15/-, & 18/6
12 in 12 " " " " " " ... 5/6, 7/6, & 10/6

In the above collections the *Bizarres* embrace the following colours,—self shades of red, crimson, scarlet, maroon, and chestnut; also flakings of orange, scarlet, crimson, brown, and black, on a lemon or golden-yellow ground. The *Byblæmens* are made up of self shades of purple, violet, lilac, and heliotrope, all with a dazzling white centre; also beautiful flakings of black, violet, purple, and lavender, on a clear white ground. The *Roses* contain lovely self shades of rose and rose-scarlet; also pretty flakings of delicate pink, soft rose, glowing scarlet, and deep crimson on a pure white ground.

A FEW GOOD NAMED VARIETIES OF ENGLISH TULIPS.

Bizarres, Byblæmens, and Roses.

In the following descriptions "breeder" indicates the self-coloured or seedling form, and "feathered" or "flamed" where the self colour has broken into a variegation. A "breeder" Tulip may at any time break into a feathered or flamed variegation.

BARR'S OLD GARDEN TULIPS.

Choice Mixture, all with flamed and feathered flowers in great variety of colour. When

massed in beds and borders these Tulips present a charming picture.....per 100, 12/6 1 9... —

VALLOTA purpurea (The Scarborough Lily), a most valuable Autumn-flowering cool greenhouse plant, producing on stout stems umbels of 5 or more large brilliant scarlet flowers which open in succession, thus remaining decorative a long time. It may be planted out of doors in May, and when in bud potted up for greenhouse or sitting-room decoration.

Established in pots, per doz. 18/- & 25/-; each 1/9 & 2 6

Strong single bulbs (dry), per doz. 10/6 1 0

× **WATSONIA** (Bugle Lily), very ornamental and showy bulbous plants, which may be grown in pots for the cool greenhouse or be planted outdoors in a warm sunny situation. The plants must be supplied with abundance of water whilst in growth and flowering.

Ardernei, a most lovely plant for pots in cool greenhouse, or for sunny warm situations out of doors; in summer it throws up elegant branching spikes 3 to 4 ft. high, with very elegant glistening snowy white flowers of great substance. If the top spike is removed when the flowers are fading the buds on the lower spikes rapidly develop, and a decoration is thus maintained for two months

Extra strong bulbs (expected from South Africa in March) per doz. 12/- & 18/-; each 1/3 & 1 8

coccinea, bearing in Summer handsome spikes of bloom of a gorgeous vermilion colour, on a reddish brown stem, ht. 1 ft. per 100, 21/-; per doz. 3/- 0 4

rosea, producing in Summer spikes of large bright rose-coloured flowers, ht. 4 ft. ,, 10/6 1 0

Hardy Border Plants for Autumn Planting—continued.

DELPHINIUM (Perennial Larkspur). Handsome stately border plants which should have a place in every garden.

DICENTRA (*syn.* **Dielytra**)

spectabilis, The Lyre Flower, a very graceful pot-plant for greenhouse and room decoration, also for summer-flowering in shrubberies or shady borders. The elegant pendent branches are loaded with heart-shaped rosy crimson flowers, and furnished with the most graceful delicate green foliage, ht. 1½ to 2 ft. clumps, per doz. 6/6

„	alba , a pretty blush-white variety of the above, ht. 1½ ft.....	„	25/-	2	3
---	---	---	------	---	---

FUNKIA—The Plantain Lily of Japan.

Handsome hardy foliage plants with attractive spikes of Lily-like flowers. The large-leaved sorts are fine border plants and particularly suitable for grouping by waterside, naturalising in wild gardens, or as distinctive objects on large lawns, etc. The foliage is best developed in woodlands and shady walks. All may be grown under glass, *subcordata grandiflora*, *Sieboldiana major*, and *undulata argentea* being specially effective. Height of flower spikes from 1 to 2 ft., height of foliage from 6 to 12 in.

Sappho (plicata), S. white frilled lilac, F. white frilled and reticulated lilac, large handsome flower, ht. 2 ft.	0	9	
Thorbeck (Amœna), S. pure white, F. clear rich violet-purple, base reticulated white, handsome, ht. 2 ft.	0	9	

For our Complete Named Collection of Tall Bearded Flag Irises see our Hardy Plant Catalogue.

Hardy Border Plants for Autumn Planting—continued.**Hardy Tree Pæonies (*Pæonia Moutan*).**

These lovely **Tree Pæonies** are quite distinct from the herbaceous Pæonies, being of a shrubby habit, with enormous flowers in early summer; they are hardy, and thrive in most ordinary garden soils enriched with manure. It is necessary when planting to select positions facing S.W., well sheltered from cutting winds and protected from the morning sun.

Beautiful distinct named varieties each 5/6, 7/6 & 10/6

For Single Chinese Pæonies and Double and Single European Pæonies see our
Hardy Plant Catalogue.

POPPIES—Giant Oriental (*Papaver Orientale*).

Barr's Selections— 6 in 6 handsome varieties..... 3/6 & 5/6
12 „ 12 „ „ 7/6 & 10/6

For fine named varieties see our **Hardy Plant Catalogue.**

SCHIZOSTYLIS coccinea (*Caffre Lily* or *Crimson Flag*), a valuable hardy Cape plant, producing in late Autumn spikes of showy globular crimson-scarlet flowers which are prized for cutting; it delights in a sheltered situation among trees and shrubs planted in a good deep loam, and during summer should be given an abundance of water during dry hot weather, ht. 1½ ft.

per 100, 10/6; per doz. 1/6

SPIRÆA (The Meadow Sweet), for Forcing or Planting Out.

The large graceful feathery pure white fragrant flowers of *Spiræa japonica*, *compacta multiflora*, and *astilboides* are most valuable for furnishing vases, while the plants are amongst the most decorative for the greenhouse and sitting-room. In forcing, a *moist atmosphere* and *abundance of water* at the roots are necessary. The pots therefore should be stood in saucers of water. In *shady or moist borders out of doors, and at the margin of streams and ponds*, the *Spiræas* are all very decorative plants.

The *Spiræas* we offer are all strong clumps.

each—s. d

japonica (<i>syn. Astilbe japonica</i>), white, ht. 2 ft.	per doz. 6/-	o	7

BARR'S SELECT LIST OF STRAWBERRIES.

Well-rooted Runners, supplied from August. *Less quantities than 50 are charged at a little higher rate.*

EARLY.

Well-rooted Runners, per 100—s. d.

Royal Sovereign , a grand variety both for forcing and open-air culture, bearing very large handsome conical-shaped fruit of luscious flavour, flesh firm and white, continuous cropper ...	5	6
Vicomtesse Héricart de Thury , a great and continuous cropper, fruit of medium size, rich in flavour, and valuable for preserving, a good early forcer	5	6

FOR MAIN CROP.

Bedford Champion , very large handsome fruit with refreshing flavour, a robust grower.....	6	6
British Queen , very large, of exquisite flavour, requires good cultivation in <i>heavy soil</i>	6	6
Countess , very handsome dark crimson fruit of extra fine flavour, moderate cropper.....	6	6
Dr. Hogg , large and handsome, <i>one of the best flavoured Strawberries in cultivation</i> , requires good culture and likes a heavy soil	6	6
Kitley's Goliath , a grand successional bearer, fruit with tender flesh of fine sugary pine flavour	5	6
Louis Gauthier , a fine new variety, producing an enormous crop of pale pink fruit of pleasant pine flavour; the new runners, if stopped beyond the first stolon and left undisturbed, produce a second crop of fruit in autumn	6	6
President , large and handsome, of richest pine flavour, heavy cropper, and valuable for general garden and main crop forcing; it retains its flavour and carries well	5	6
Progress , a fine variety for dry seasons, large fruit with melting white flesh of fine flavour	6	6
Reliance (new) , resembling <i>Vicomtesse Héricart de Thury</i> in flavour, but with larger fruit	6	6
Reward (new) , one of the best main crop varieties, resembling rather British Queen , with very large wedge-shaped fruit, of firm flesh and bright colour	6	6
Sir Joseph Paxton , handsome solid fruit of delicate flavour, very prolific, <i>a favourite market variety</i> , as it is hardy and travels well	5	6
The Bedford , bearing a good crop of handsome round fruit of finest flavour	8	6

LATE.

Filbert Pine , a fine late variety producing a heavy crop of orange-red fruit, of rich brisk flavour; a robust grower, and good for light soils.....	6	6
Givon's Late Prolific , the <i>finest late Strawberry</i> , bearing a heavy crop of very large dark red fruit, firm and of rich brisk flavour	5	6

STRAWBERRIES—continued.**VERY LATE.**

Well-rooted Runners, per 100—s. d

Eleanor , a fine free-growing large variety, producing enormous successional crops	4	6
Waterloo , very large dark fruit, conical in shape, valuable for dessert; it carries well, and may be forced as a last crop	6	6
Laxton's Latest , a grand variety with enormous fruit of a fine deep crimson, after Waterloo but having a richer pine flavour	6	6
President Loubet (new) , a seedling from Waterloo , very large fruit of rich pine flavour	6	6

Strawberry Plants in Small Pots.

To fruit first season outdoors or for shifting into large pots for forcing ...per 100, 17/6; per doz. 2/6

TRUE ALPINE AUTUMNAL STRAWBERRIES.

In growing these for Autumn cropping, remove the Spring blossoms in order to induce the plants to make runners, as these last produce the best fruit.

Well-rooted Runners, per 100—s. d

Bergeri , fruit rich crimson, free bearer	4	0
Millet (new) , a fine variety, the fruit measuring up to 2½ in. long, vigorous grower	5	6

Tea-scented "Roses in" Pots , in named varieties, Established in pots for forcing, per doz.	30	0

USEFUL TOOLS FOR BULB PLANTING, Etc.

Barr's Special Bulb Planter, specially designed for planting Daffodils and other bulbs in grass. This tool cuts and lifts a clean circular piece of turf, which is released from the cup when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have been put in, it being only necessary to remove a little of the soil from the bottom of the sod. A time must be

Rd. 548091.

BARR'S BULB PLANTER.

BARR'S SPECIAL BULB PLANTER a large quantity of bulbs may be planted in a very short time, and without the least disturbance of the sward. The length of the tool is 38 inches over all, weight about 3½ lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting edge.

Supplied in 3 sizes of cup:—To cut out a circular hole 2 inches diameter } 10/6 each
 " " " 2½ " " }
 " " " 2½ " " }

We shall send the medium size (2½ in.) if no instructions to the contrary are given.

Barr's Special Bulb Dibber, specially designed for dibbling bulbs into borders, etc.; steel shod, with strong iron tread and cross wooden handle; a good strong heavy tool, weight about 6½ lbs., length 36 inches over all. 9/6 each.

Rd. 468878.

BARR'S BULB DIBBER
BARR'S BULB AND POTATO
DIBBER, 36 IN.

New Pattern Hoe, a very useful tool for breaking the surface soil in the Flower Border during dry weather, and especially in early spring when Daffodils are just showing; also a useful weeding tool. With 3 ft. handle (41 inches over all and weight under 1 lb.), 1/9 each, with short handle (12½ inches), 1/3 each.

BARR'S BULB TROWEL.

For a fuller list of Tools and other Garden Requisites, see **Barr's Seed Guide**.

Wire Supports (brass), 4/6 per doz.

BULB VASES AND BOWLS. See page 2 of Cover and Illustrated List on application.

MANURES, SOILS, COCOA FIBRE, etc.

Barr's Phytobroma, the best Manure for Daffodils, Hyacinths, Tulips, etc., and for Flower Borders generally. It should be mixed with the soil *below* the bulbs at planting time at the rate of 2 to 3 ozs. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. **For Pots**, mix *Phytobroma* with the soil, to be used at the rate of 1 lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil. 2-lb. tin, 1/-; 7 lb. 2/6; 14 lb. 4/6; 28 lb. 7/6; 56 lb. 12/6; 1 cwt. 20/-.

Basic Slag, per cwt. 6/6; per 14 lb. 1/-.

Bone Meal (*Genuine fine Crushed Bones*), best quality, per cwt. 12/6; per 7 lb. 1/-.

Sulphate of Potash, per cwt. 21/-; per 7 lb. 1/9.

Ammonia, per cwt. 21/-; per 3 lb. tin, 1/-.

Nitrate of Soda, per cwt. 21/-; in tins, 6d., 1/-, and 2/6 each.

Vaporite, for destroying Wireworm, Woodlice, and other injurious insect life in soil, sample tin, 9d.; 7 lb. tin, 2/-; 28 lbs., 4/6; ½ cwt., 6/6; 1 cwt. 10/-.

Barr's Improved Fertilised Fibre, Shell, and Charcoal Mixture for growing Bulbs in Bowls, Jardinets, Glasses, etc. Specially recommended for Hyacinths grown in glasses: fill the glasses with the preparation, and add water till no more can be absorbed. Place the bulb so as to rest the base on the preparation, and tie it down with brown paper, leaving an opening in the centre of the paper for the shoot. When the bulb has well rooted the paper may be removed; care must be taken that the material in the glass is kept wet. The same remarks apply to bulbs grown in bowls, etc.: they must be kept in place till they have rooted. Our Fibre Mixture is sent out ready for use. 3/6 per bushel; 1/- peck.

Loam, Peat, Leaf Soil, Silver Sand, each, per bushel, 2/6.

Barr's Specially Prepared Potting Soil, containing a suitable quantity of *Phytobroma*, per bushel, 2/6.

Cocoa Fibre, per bushel, 1/3; 3 bushels for 3/6 (*bags free and full measure guaranteed*).

Small Pebbles and Charcoal, suitable for growing Hyacinths, etc., in bowls and vases without drainage, 6d. per quart; 3/6 per peck.

Charcoal (fine twig), per peck, 1/-; per bushel, 3/6.

Fresh Sphagnum Moss, 3/6 per bushel.

For a fuller List of Garden Requisites, see **BARR'S SEED GUIDE**, free on application.

Special Notices and Terms of Business.

FREE CARRIAGE OF BULBS.

All Orders for Bulbs to value £1 and upwards sent **Carriage Paid** to any Railway Station in the United Kingdom.

Prepaid Orders for Bulbs to value 10s. and upwards sent **Carriage Paid** to any Railway Station in the United Kingdom.

5% Cash Discount on Bulb Orders of 20s. and upwards.—1s. in the £ discount is allowed for Cash with Order (*with the exception of the special Collections offered on pages 5 and 6, which are strictly nett*), and this may be deducted by the Customer when remitting or if this is not done, a liberal equivalent in goods will be added to the Order. The same discount may also be deducted from all Bulb Accounts of 20s. and upwards when paid within 14 days from date of invoice (*excepting Collect ons offered on pages 5 and 6, which are nett*).

Terms of Credit.—Our books are made up half-yearly, when all accounts are due nett.

Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed "London County and Westminster Bank." Small amounts may be remitted in Postage Stamps, or Coin in a Registered Letter.

Packages.—Boxes, Bags, etc., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and an advice sent by post, stating date of despatch and name of Railway Co.*

Catalogues. Our Seed Guide is published in January. **Descriptive Catalogue of Bulbs and Tubers for Winter and Spring Planting** in January, **Hardy Plant Catalogue** 1st of March, **Daffodil and General Bulb Catalogues** in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

OUR NEW TAPLOW NURSERIES.

During the Autumn of 1911 we are removing from Surbiton to larger Nurseries at **Taplow**, where visitors next Spring will be able to view our grand collections of **Daffodils** and **Tulips** in bloom. The Nurseries are adjoining the main line of the Great Western Railway, and are entered from the Bath Road within quite a short distance of **Taplow Station**. Cabs are always to be had at Taplow Station.

Notices to our Foreign and Colonial Correspondents.

Prepayment necessary.—Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an "order to pay" on a London Bank, or Agent*; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

Cash Discount 5%.—In the case of Prepaid Orders to value 20s. and upwards we allow a discount of 1s in the £ from the amount of **Bulbs or Seeds** ordered, which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the order.

Carriage—No allowance for Carriage can be made in the case of Foreign Orders; the extra attention necessary precludes any kind of allowance in this respect.

Packing.—A moderate charge will be made where special materials have to be used, such as Sphagnum Moss, Oil-silk, etc., and where any special packing necessitates a great deal of labour (as in the case of some Plant Orders), when out-of-pocket expenses only will be charged.

Parcel Post Rates.—

AUSTRALIAN COMMONWEALTH including TASMANIA and NORFOLK ISLAND (*P. & O. and Orient Lines direct*): 6d. per lb. (1s. for the first lb.).

NEW ZEALAND: under 3 lb. 1s.; 7 lb. 2s.; 11 lb. 3s. (**AUCKLAND, WELLINGTON, CHRISTCHURCH, and DUNEDIN** are the only ports of entry for bulbs and plants. The nearest port should be stated on order.)

CAPE COLONY and NATAL: 9d. per lb. **TRANSVAAL**: 9d. per lb.

INDIA (*P. & O. Line direct*): Under 3 lb., 1s.; under 7 lb., 2s.; under 11 lb., 3s.

CANADA: under 3 lb. 1s.; under 7 lb. 2s.; under 11 lb. 3s.

JAPAN (*via Canada, 26 days to Yokohama*): Under 3 lb., 2s.; under 7 lb., 3s.; under 11 lb., 4s.

CHINA (*via P. & O. Line direct*): Under 3 lb., 1s.; under 7 lb., 2s.; under 11 lb., 3s.

UNITED STATES of America. By *Official Service* to all places in U.S.A. Under 3 lb., 1s. 6d.; under 7 lb., 2s. 6d.; under 9 lb., 3s. 6d.; under 11 lb., 4s. 6d.

Shipping, etc.—In Shipping Bulbs and Plants to Australia, New Zealand, America, India, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies extends over a long period.
